MINING CLAIM STATUS, FAIRBANKS MINING DISTRICT APRIL 1981

Compiled by

L. Lueck and J.E. Sperber

A cooperative effort by
the Mineral Industry Research Laboratory, University of Alaska and the Alaska Division of Geology and Geophysical Surveys

EXPLANATION

Indicates four contiguous claims. Gap is for drafting convenience and does not indicate unclaimed land.

State mining claim with Alaska Division of Lands (ADL) number. Contact Alaska Division of Minerals and Energy Management (DMEM).

State or federal mining claim listed by State Kardex number. Contact Alaska Division of Minerals and Energy Management or the U.S. Bureau of Land Management (BLM).

Federal unpatented mining claim with BLM serial number. Contact U.S. Bureau of Land Management.

Federal patented mining claim with federal mineral survey number. Contact U.S. Bureau of Land Management.

Federal unpatented mining claim with federal mineral survey number. Contact U.S. Bureau of Land Management.

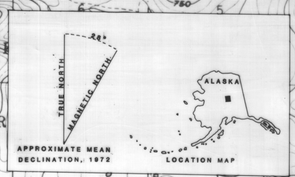
NOTE:

State mining claims and federal patented and unpatented mining claims located in the Fairbanks mining district prior to 1981 are shown in this report, which is part of a larger study entitled "Mineral Resource Appraisal of the Interior Alaska Mining Districts." This work is the result of a cooperative effort between the Mineral Industry Research Laboratory, University of Alaska, and the State of Alaska - Division of Geological and Geophysical Surveys.

The sources of mining-claim information used in this compilation include: a) State of Alaska - Division of Forest, Land, and Water Management, b) State of Alaska - Division of Geological and Geophysical Surveys, c) U.S. Bureau of Land Management, d) Fairbanks North Star Borough Tax Office, and e) Fairbanks District Court Recorders Office. This map has been compiled solely from information submitted by locators to the public recording centers. Field checks of all locations should be made prior to further land acquisition or land utilization.

This report is a graphical representation of mining claims in the Fairbanks district and is intended to provide a starting point in any claim-searching process; it should not be considered a final compilation of mining-claim status.



This is a preliminary publication of the Alaska Division of Geological and Geophysical Surveys and as such has not received final editing and review. The author will appreciate candid comments on the accuracy of the data, and welcome suggestions that will improve the report.
