WAINWRIGHT

MAP UNITS

QUATERNARY

- Q — Undivided Quaternary
- Qt — Terrace gravels
- Qc — Colluvium
- Qh — Ilyrak gravels
- QTs — Saligvik gravels
- QTu — Essentially Quaternary. May include Tertiary/Cretaceous rocks

UPPER CRETACEOUS

- Kpc — Prince Creek Formation
- Seabee Formation
- Corwin Formation
- Kukpowruk Formation
- Colville Group
- Kn — Nanushuk Group —C— Base Corwin

LOWER CRETACEOUS

- Kt — Torok Formation
- Kfm — Fortress Mountain Fm
- Kk — Kisimiloik Formation
- K-Ts — Cretaceous through Triassic undivided

JURASSIC

- KJt — Telovrak Formation
- KJo — Ogotoruk Formation
- KJot — Ogotoruk and Telovrak undivided

TRIASSIC

- Shublik Formation
- TRPss — Shublik and Siksikpuk undivided

PERMIAN

- Siksikpuk Formation

PENNSYLVANIAN(?)

- Nuka Formation
- PC — Permian and Carboniferous undivided

MISSISSIPPIAN

- Mlt — Tupik Formation
- Mlk — Kogruk Formation
- Utukok Formation
- Ms — L. Mississippian sedimentary rocks undivided
- Mln — Noatrak Formation
- Mlu — Lisburne Group undivided

DEVONIAN

- D — Devonian undivided

IGNEOUS ROCKS

CRETACEOUS-JURASSIC

- KJi — Cretaceous-Jurassic intrusive

GEOLOGIC SYMBOLS

Symbols dashed where position indefinite, dotted where concealed and questioned where inferred

STRIKE AND DIP - Bedding in sedimentary rock, principal planar features in igneous or metamorphic rock

- Horizontal
- Dip less than 3°
- Dip 3° to 10°
- Dip 10° to 25°
- Dip 25° to 45°
- Dip more than 45°
- Vertical
- Overturned
- Degree of dip indeterminate
- Probable dip slope. Inferred from possible bedding
- Based on geomorphic criteria such as divide asymmetry
- General dip of beds having subordinate folds
- Strike line
- Dip component
- Structural grain
- Reported, published or other source
- Foliation

FAULTS AND FRACTURES

- Major fault trace — Fault plane dip high.
- Major thrust — Fault plane dip low to moderate. Probably folded
- Minor thrust — Fault plane dip low to moderate. Possibly folded
- Minor fault trace — Fault plane dip moderate to high
- Dip of fault plane, dip and strike separation are indicated where possible. Triangles on upper plate of thrust.
- Lineament, fracture zone
- Joint or fracture
- Definite or probable fracture trace
- Minor fracture trace

FOLDS

- Crest line of anticline or antiform showing apex and plunge
- Trough line of syncline or synform showing high point and plunge
- Anticline and syncline based on geomorphic evidence
- Overturned anticline and syncline
- Anticline and syncline coincide with fault trace
- Structural terrace
- Monocline
- Topographic feature possibly controlled by strike or structure, "S" on downdip side
- Probable
- Possible
- Positive structural anomaly based on geomorphic evidence

ANOMALY CRITERIA ABBREVIATIONS

AD	Annular Drainage	FL	Flaring Linears	PDC	Possible Dip Control
AMR	Arcuate Mosaic Ridges	HD	High Density Fracture Zone	PS	Ponded Stream
BD	Barbed Drainage	ID	Increased Dissection	RD	Radial Drainage
CD	Centripetal Drainage	IS	Incised Stream	RF	Radial Fractures
CPC	Channel Pattern Change	IT	Inverted Topography	SA	Subannular Drainage
DC	Dip Control	LP	Lake Pattern	SR	Subradial Drainage
DD	Deflected Drainage	MD	Moraine Deflection	TA	Tonal Anomaly
DS	Defeated Stream	MM	Meander Migration	TD	Topographic Dissection
DT	Dissected Terrace	MO	Moderate Obsequent Drainage	TF	Topographic Flattening
FC	Floodplain Constriction	OA	Outcrop Area	TH	Topographic High
FF	Flank Fractures	OD	Obsequent Drainage	TS	Topographic Steepening

CONTACTS

- Contact
- L — Major lithologic change. Possible formation/member boundary
- K — Key horizon
- C — Color or tonal change
- V — Vegetation change
- MB — Morphologic break
- Topographic change. Arrows on high side

SPECIAL SYMBOLS

- Connects same map unit
- X — Outcrop in mantled area
- Drainage divide
- Escarpment
- Mine or prospect
- Mountain peak
- Glacier or snow field
- Glacial striation — Direction of ice movement indicated
- Abandoned stream channels
- Muskeg
- Oil
- Gas
- Dry and abandoned
- Oil show
- Primary road
- Secondary road
- Trail
- Bridge
- Airport
- Landing strip
- Town
- Settlement
- Clearing
- Braided stream
- Gas show
- Oil and gas show
- Structural, stratigraphic test
- Drilling
