

AREAS BEING FLOWN FOR THE 2013 AIRBORNE GEOPHYSICAL CONTRACT

Areas being flown for the 2013 Airborne geophysical contract are all of the area for East Styx (figure 4.2) and all of the area EXCEPT for D for Wrangellia (Figure 4.3). None of the “Eastern Survey” is being flown.

The following figures were taken from the RFP, available at the following link:

<http://aws.state.ak.us/OnlinePublicNotices/Notices/View.aspx?id=168020>

The digital blocks are available from that link.

**NOTE: If you are interested in flight line location, contact Laurel Burns [mailto:
Laurel.Burns at Alaska.gov], 907-451-5021.**

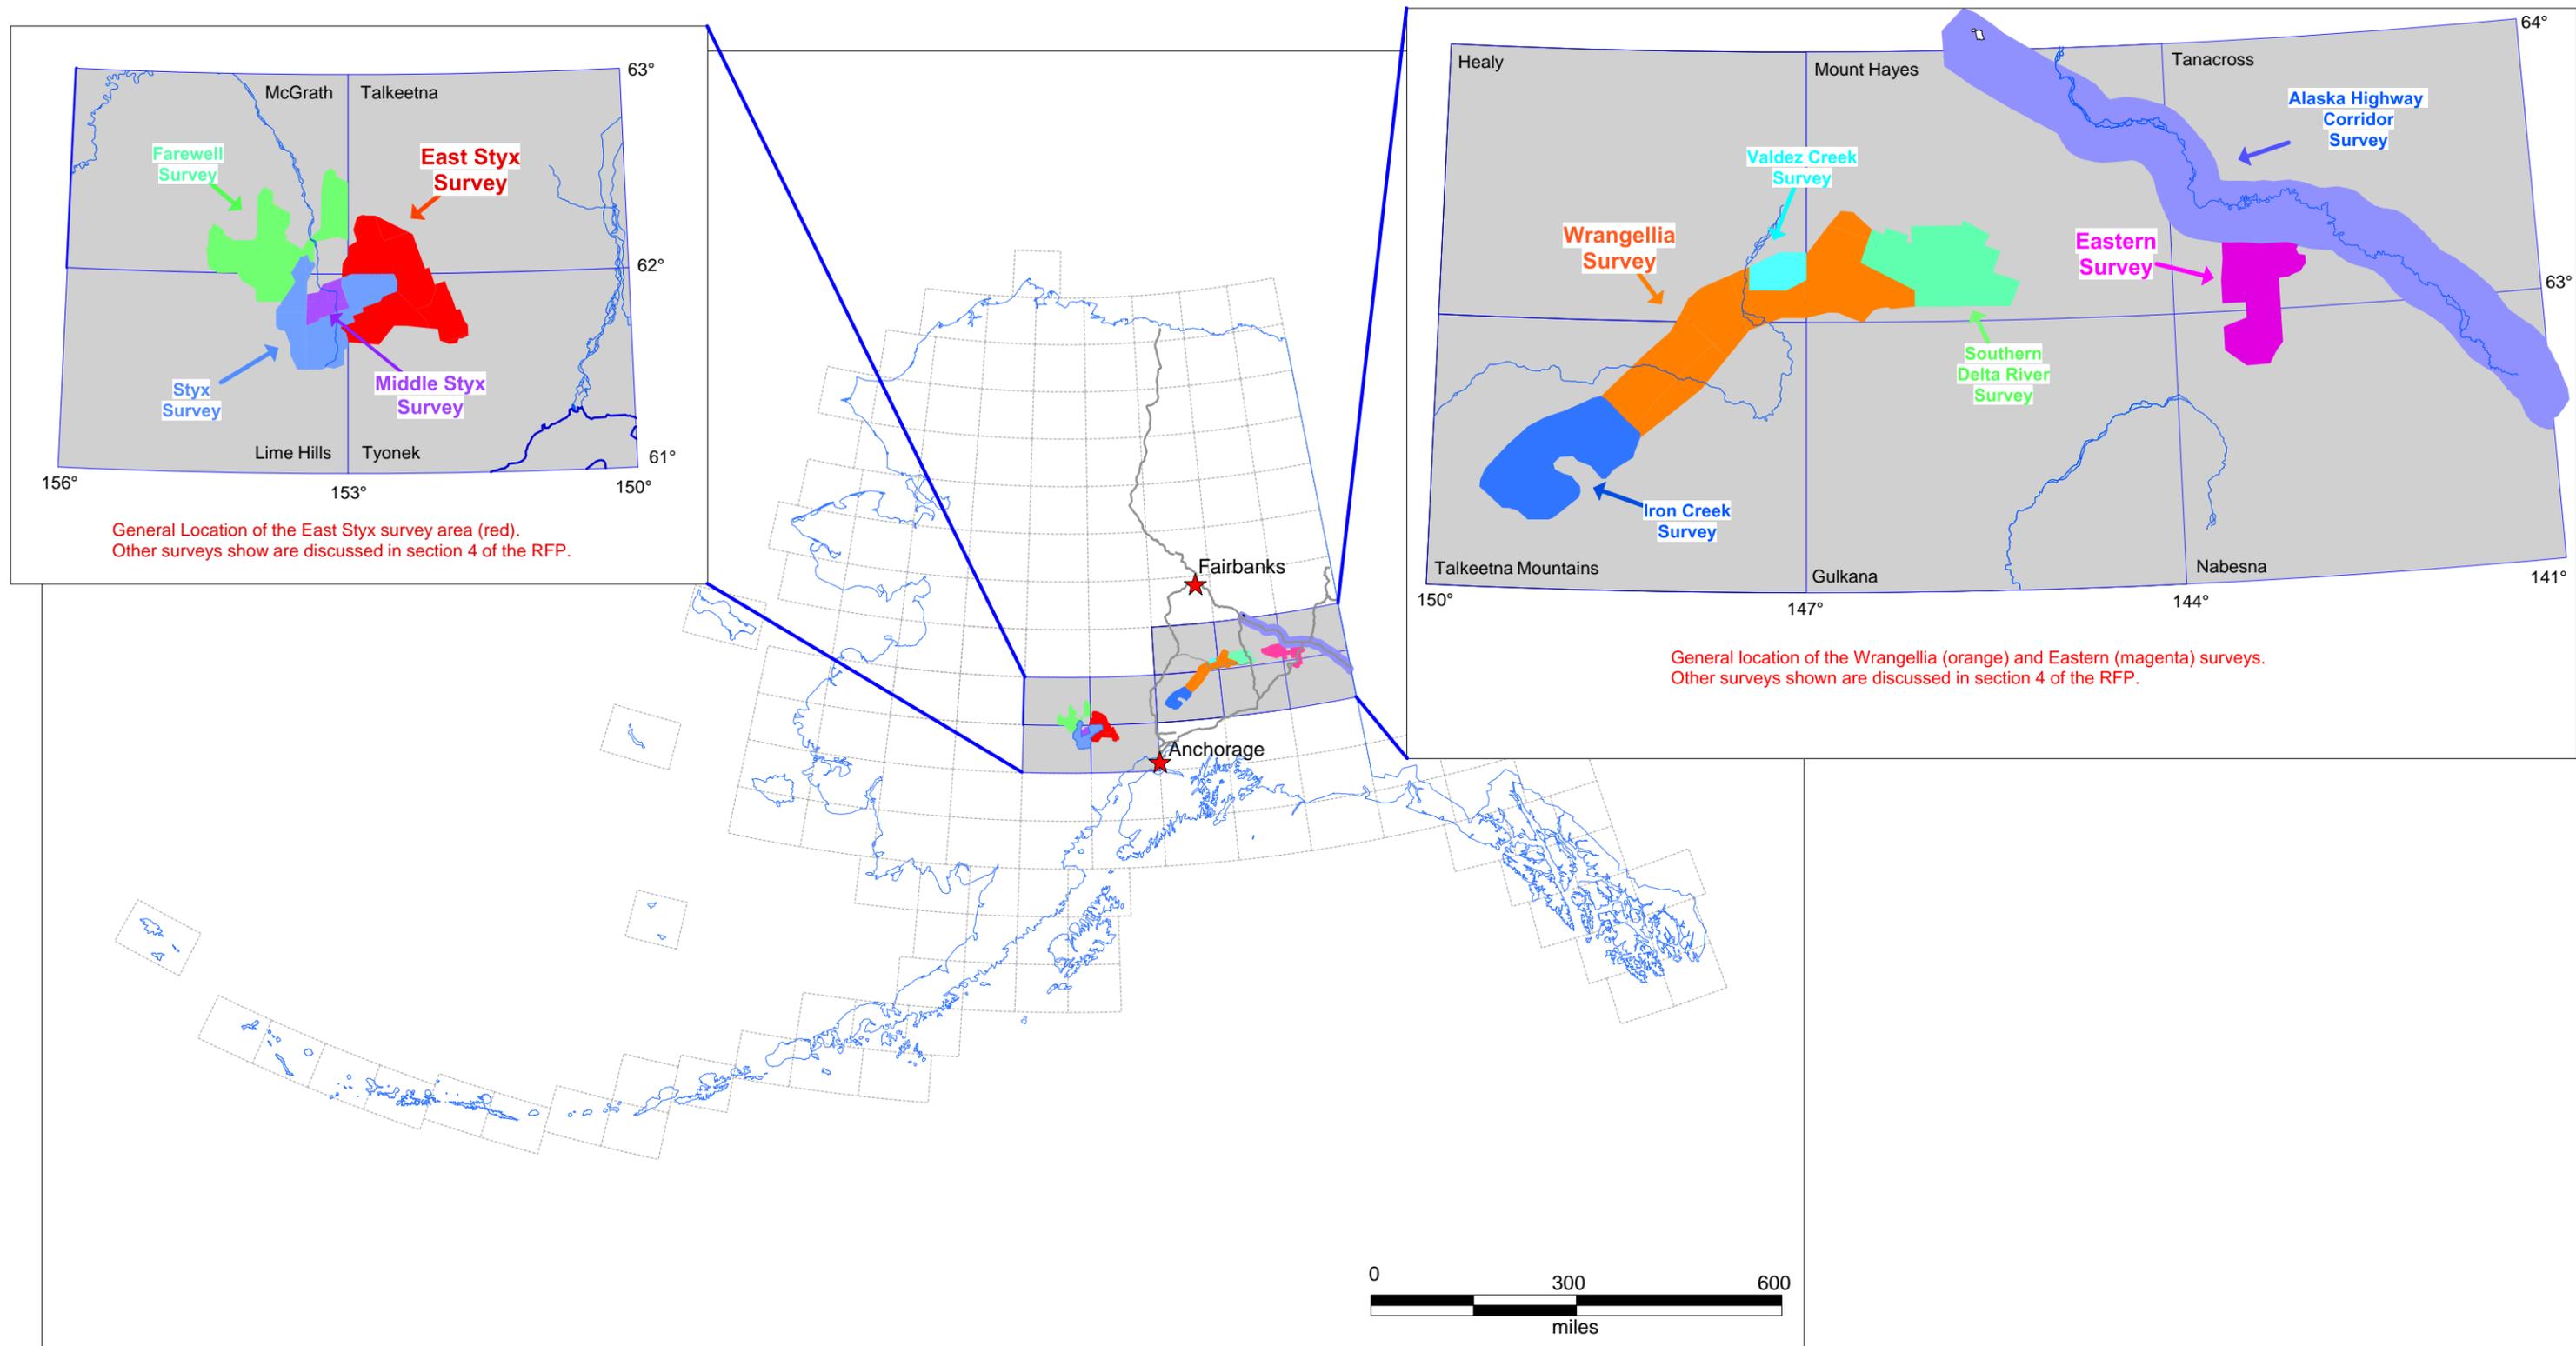

Figure 4.1: General location of the East Styx, Wrangellia and Eastern survey areas. Major roads are shown in solid grey lines on the main figure. U.S. Geological Survey 1:250,000-scale quadrangle boundaries are shown with dotted lines except near survey blocks.

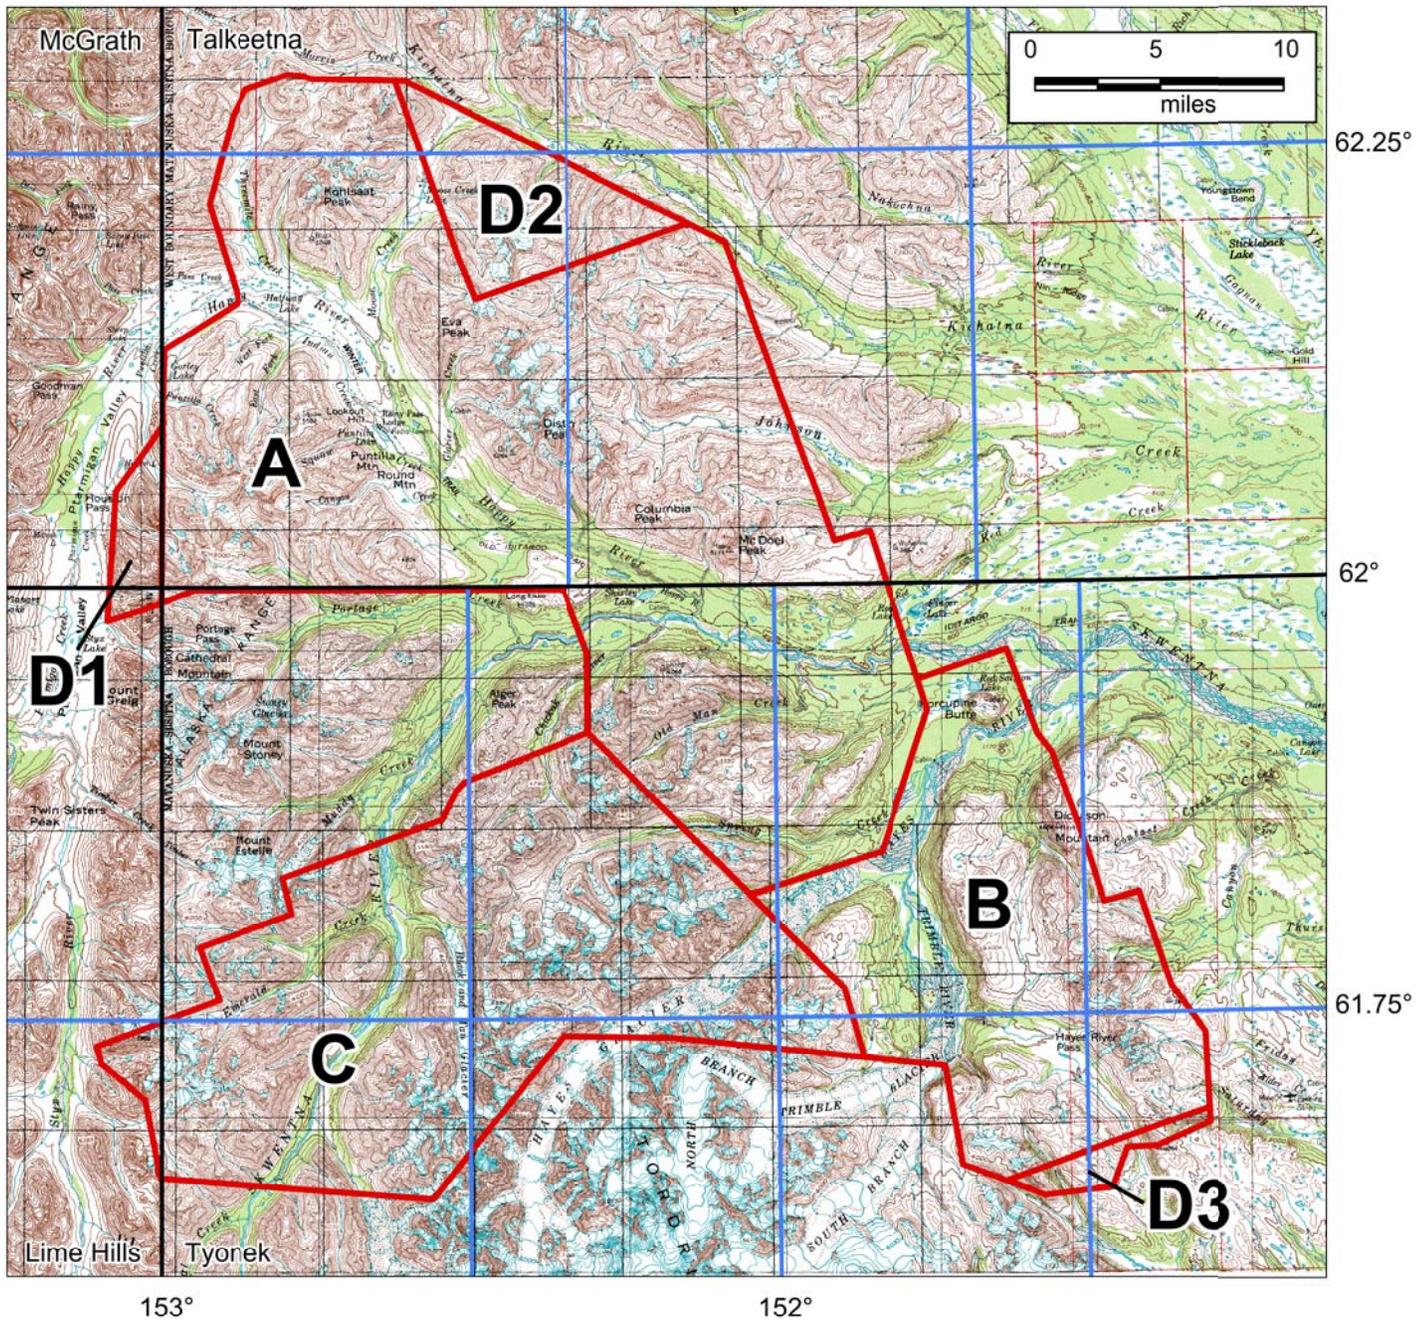

Figure 4.2: Figure showing location of potential survey blocks for East Styx survey: Traverse flight direction is to be N70°E. Blue lines represent 1:63,360-scale quadrangles. Figure in NAD27, UTM zone 5 North.

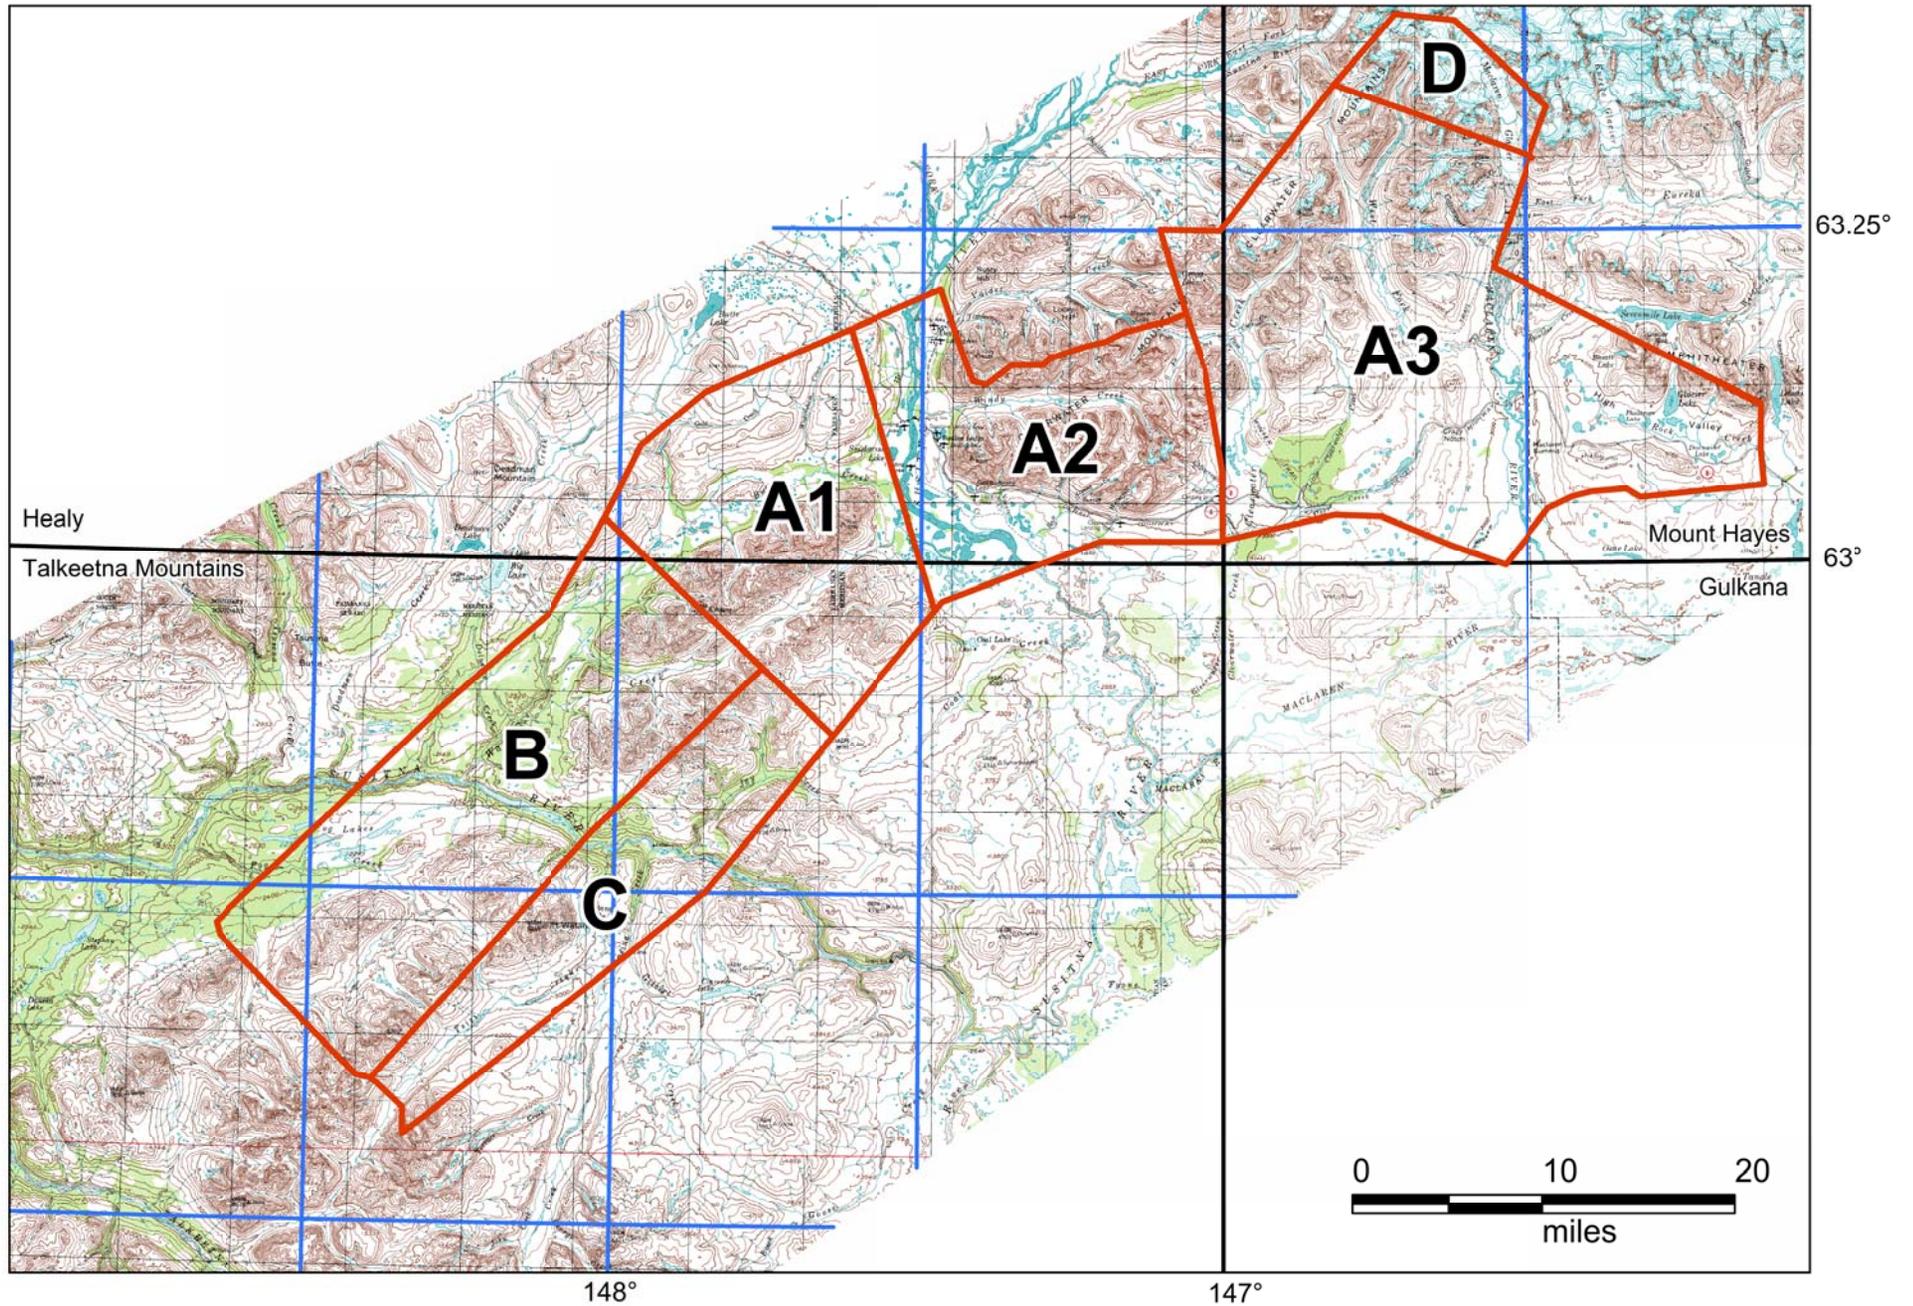

Figure 4.3 Wrangellia Survey Location: Traverse flight direction is to be N45°W for blocks B,C and A1, N18°W for A2, and N-S for A3 and D. Blue lines represent 1:63,360-scale quadrangles. Figures in NAD27, UTM zone 6 North.
