State Geologist and Acting Director

DATE: 1 February 2008

FILE NO:

FROM: John W. Reeder
Curator, Alaska Geologic Materials Center

SUBJECT: Monthly Report – January

1. The Alaska Geologic Materials Center (GMC) received from the Alaska Oil and Gas Conservation Commission the following oil/gas exploratory well sample materials:

Aurora Gas LLC Kaloa No. 4 washed cuttings (60'-4,431').

2. The Alaska GMC received the following Data Report:

No. 350: Mercury injection capillary pressure data from selected wells in the NPRA, Alaska as follows:
U. S. Navy Ikpikpak No. 1 core (7,369'-7,370'), cuttings (7,430'-7,480') and sidewall core (7,474');
Husky Oil NPR Operations (U. S. G. S.) South Meade No. 1 cuttings (6,700'-6,710');
ARCO Alaska Inc. Brontosaurus No. 1 cuttings (4,340'-4,370') and core (4,397'-4,404');
Husky Oil NPR Operations (U. S. G. S.) Walakpa No. 1 core (2,035'-2,078.2'); and
Husky Oil NPR Operations (U. S. G. S.) Walakpa No. 2 cuttings (2,580'-2,610') and core (2,611'-2,635').

3. GMC had **154** telephone or written contacts during the reporting period. There have been **37** visitations to the GMC since 31 December 2007, including representation from:

Aeon Biostratigraphic Services (Anchorage)
Alaska Earth Sciences (Anchorage)
IRF Group, Inc. (Anchorage)
Petro-Canada (Alaska) Inc. (Calgary, Alberta, CANADA)
State of Alaska Division of Geological and Geophysical Surveys; Dept. of Natural Resources (Fairbanks)
Talisman Energy Inc.; FEX (Anchorage)
University of Alaska Fairbanks, Dept. of Geology and Geophysics
U. S. Geological Survey (Anchorage)

****** NOTICE ******

Curator John W. Reeder will be gone from the Alaska GMC from 18 February 2008 through 7 March 2008. During this time, **Susan Browne will be acting curator**. It is recommended that if you have any sampling needs during this time that you make arrangements with the GMC before 18 February 2008.

SUBJECT: Monthly Report – February

1. The Alaska Geologic Materials Center (GMC) received from the **Alaska Oil and Gas Conservation Commission** the following oil/gas exploratory well sample materials:

Aurora Gas LLC Three Mile Creek Unit No. 2 washed cuttings (90’-5,305’), and
ConocoPhillips Kuparuk River Unit West Sak 1Q-101 washed cuttings (120’-5,000’).

2. The Alaska GMC received the following **Data Report:**

No. 351: Geochemical analysis of Alaska North Slope NPR-A oil samples at the Alaska GMC from:

Umiat (generic) – Nanushuk Reservoir,
U. S. Navy Simpson Core Test No. 27 – Nanushuk Reservoir, and
North Slope Borough (U. S. Navy) South Barrow No. 12 – Sag River Reservoir.

3. GMC had **159** telephone or written contacts during the reporting period. There have been **34** visitations to the GMC since 31 January 2008, including representation from:

SUBJECT: Monthly Report – March

1. The Alaska Geologic Materials Center (GMC) received from the **Alaska Oil and Gas Conservation Commission** the following oil/gas exploratory well sample materials:

Aurora Gas LLC Kaloa No. 2 washed cuttings (20'-3,220'),
Aurora Gas LLC Moquawkie No. 3 washed cuttings (90'-2,580'),
Aurora Gas LLC Lone Creek No. 3 washed cuttings (60'-3,030'),
Marathon Oil Company Kenai Beluga Unit 11-7 core chips (5,080'-5,254'),
Teck Cominco Alaska Incorporated NB 01 washed cuttings (86'-2,726'),
Teck Cominco Alaska Incorporated NB 02 washed cuttings (103'-3,110'),
Union Oil Company of California Happy Valley A-2 washed cuttings (3,100'-10,225'), have two sets,
Union Oil Company of California Happy Valley A-4 washed cuttings (950'-10,620'),
Union Oil Company of California Happy Valley A-6 washed cuttings (1,070'-11,798'),
Union Oil Company of California Happy Valley B-12 washed cuttings (120'-10,400'), and
Union Oil Company of California Happy Valley B-13 washed cuttings (1,170'-7,746'),

2. The Alaska GMC received the following **Data Report**:

No. 352: Chemostratigraphy of Oligo-Miocene sequences in Cook Inlet, Alaska as based from core samples from the following wells:

ConocoPhillips Alaska Inc. North Cook Inlet Unit A-02 (4,445.5'-5,014.5'),
XTO Energy Inc. (Shell Oil Company) Middle Ground Shoal A13-01 (4,150.0'-8,533.3'),
XTO Energy Inc. (Shell Oil Company) Middle Ground Shoal A33-11 (8,612.5'-9,392.0'),
XTO Energy Inc. (Shell Oil Company) Middle Ground Shoal C31-26 (8,445.0'-9,068.0'),
ARCO Alaska Inc. Swanson River Unit 34-10, which is the Swanson River Unit No. 1 discovery well (4,720.37'-12,276'), and
Standard Oil Company of California Deep Creek Unit No. 1 (1,000.0'-13,773').

3. GMC had **209** telephone or written contacts during the reporting period. There have been **73** visitations to the GMC since 29 February 2008, including representation from:

Aeon Biostratigraphic Services (Anchorage)
Arctic Slope Regional Corporation, ASRC Energy Services (Anchorage)
Benchmark Oil & Gas Company (Houston, Texas)
Hite Consulting (Anchorage)

1. The Alaska Geologic Materials Center (GMC) received from the **Alaska Oil and Gas Conservation Commission** the following oil/gas exploratory well sample materials:

Conoco-Phillips Alaska Inc. Antigua No. 1 washed cuttings (0'-6,850'),
Kerr-McGee Oil Corp Nikaitchuq No. 2 core chips (10,390'-10,480'),
Kerr-McGee Oil Corp Kigun No. 1 washed cuttings (1,948'-9,098'),
Marathon Oil Company Ninilchik State No. 1 washed cuttings (1,745'-10,340'),
Marathon Oil Company Ninilchik Unit Susan Dionne No. 4 core chips (8,256'-8,341', & 10,940'-11,032'),
Pioneer Natural Resources Hailstorm No. 1 washed cuttings (60'-9,840'),
Pioneer Natural Resources Cronus No. 1 washed cuttings (0'-7,940'), and
Union Oil Company of California Happy Valley A-3 washed cuttings (1,010'-7,430').

2. The Alaska GMC received the following processed materials from the **U. S. Minerals Management Service**:

Exxon OCS Y-0080-1 (Raccoon No. 1) – 6 calcareous nannofossil glass slides from cuttings (8,220'-13,500') and 6 palynology glass slides from cuttings (8,220'-13,500'), and

Marathon Oil Co. OCS Y-0086-1 (Puffin No. 1) – 1 kerogen/TAI glass slide from core (9,416'-9,430'), 1 palynology glass slide from core (9,416'-9,430') and 1 vitrinite reflectance plug from core (9,416'-9,430').

1. The Alaska Geologic Materials Center (GMC) received from the **Alaska Oil and Gas Conservation Commission** the following oil/gas exploratory well sample materials:

Union Oil Company of California Happy Valley A-10 unwashed cuttings (60'-8,420'), and **Union Oil Company of California Happy Valley A-11** washed cuttings (1,000-10,082').

2. The GMC received the following processed materials from the **Minerals Management Service:**

Texaco OCS Y-0032-1 (Rachel No. 1) – 68 siliceous microfossil slides from cuttings (475'-15,280').

3. The GMC received **diamond drill core** from geologist Milt Wiltse for four holes of the 1972 Wallace MacGregor and Louisiana Land and Exploration Co. **Ruo Cove** massive sulfide prospect of Prince William Sound. These cores are as follows: RC-1, 10'-125', not complete, 5 boxes; RC-2, 81.6'-182.1', not complete, 5 boxes; RC-3, 141.3'-155', not complete, 1 box; and RC-4, 8.5'-66.9', complete, 3 boxes.

4. The GMC received 6 pallets of **Alaska Div. Geological & Geophysical Surveys** surface rock samples.

5. The GMC received from the **Bureau of Land Management** 9 pallets of Alaska surface rock samples.

6. The GMC had **229** telephone or written contacts during the reporting period. There have been **51** visitations to the GMC since 31 May 2008, including representation from:

Aeon Biostratigraphic Services (Anchorage)
Alaska Oil and Gas Conservation Commission (Anchorage)
Carnegie Minerals Plc. (Melbourne, Australia)
Cathedral Rock Enterprises Llc. (Kimberly, Oregon)
IRF Group, Inc. (Anchorage)

Curator, Alaska Geologic Materials Center

SUBJECT: Monthly Report – July

1. The Alaska Geologic Materials Center (GMC) received from the **Alaska Oil and Gas Conservation Commission** the following oil/gas well sample materials:

BP Exploration ALASKA Inc. West Gwydyr No. 1 unwashed cuttings (600'-11,030'; the washed cuttings were received March 2002 and again directly from BP Exploration (Alaska) Inc. as a donation),

ConocoPhillips Endeavor No. 1 washed cuttings (60'-8,420'),

Kerr McGee Ataruq No. 2 washed cuttings (110'-7,400'),

Kerr McGee Ataruq No. 2A washed cuttings (3,360'-11,242'),

Union Oil Company of California Happy Valley A-1 washed cuttings (1,050'-10,870'),

Union Oil Company of California Happy Valley A-3 washed cuttings (7,430'-11,344'; shallower cuttings were received in May 2008),

Union Oil Company of California Pearl No. 1 washed cuttings (5,060'-7,480', which completes cuttings received in June 2007),

Union Oil Company of California Red No. 1 washed cuttings (70'-12,458'), and

Union Oil Company of California Red No. 2 washed cuttings (1,530'-10,180').

2. The GMC received from industry the following processed oil/gas well materials:

ARCO Alaska Inc. Meltwater North No. 2 – 10 petrographic thin sections of core (5,731'-5,866'),

ARCO Alaska Inc. Meltwater South No. 1 – 14 petrographic thin sections of core (7,278'-7,407'),

ARCO Alaska Inc. Tarn No. 2 – 27 petrographic thin sections of core (5,517'-5,642'),

ARCO Alaska Inc. Tarn No. 3 – 20 petrographic thin sections of core (5,217'-5,306'),

ARCO Alaska Inc. Tarn No. 4 – 19 petrographic thin sections of core (5,460'-5,539'),

ConocoPhillips Alaska Inc. Kuparuk River Unit Palm 3S-16 – 16 petrographic thin sections of core (5,913'-5,928'),

ConocoPhillips Alaska Inc. Kuparuk River Unit Tarn 2N-313 – 28 petrographic thin sections of core (8,576'-8,818'), and

Sinclair Oil and Gas Little Twist Unit No. 1 – 5 petrographic thin sections of core (1,508'-1,516'; and 2,505'-2,509').

3. The GMC received **11 pallets** of rock reject and pulp from core and soil samples of the **Calista Corporation Nyac** (a name derived from New York Alaska Company) gold property of **Tuluksak River** in Southwestern Alaska. The **Calista Corporation** also kindly **donated one 40' metal container**, which has already been positioned at the GMC facility. The GMC now has a total of 58 metal containers.

4. The GMC received the following Data Report:

No. 353: Viscosity and Gravity of Historical Oil Samples from U. S. Navy Umiat (Blend, unknown well number) and from **U. S. Navy Umiat Ruby No. 1** (renamed **Umiat Test Well No. 4**); both from the Irv Tailleir U. S. Geological Survey collection at the Alaska GMC.

SUBJECT: Monthly Report – September

1. The Alaska Geologic Materials Center (GMC) received from the **Alaska Oil and Gas Conservation Commission** the following oil/gas exploratory well samples:

Teck Cominco Alaska Incorporated NB-03 cuttings (106'-3,502'),
ConocoPhillips Alaska Inc. Kuparuk River Unit 1H-South cuttings (100'-7,550'),
ConocoPhillips Alaska Inc. Kuparuk River Unit 1H-North cuttings (60'-4,631'),
ConocoPhillips Alaska Inc. Kuparuk River Unit 1R-East cuttings (60'-8,075'), and
Union Oil Company of California Soldotna Creek Unit 42-05X cuttings (2,650'-8,155').

2. The GMC received the following processed materials from the U. S. **Minerals Management Service**:

ARCO Alaska Inc. OCS Y-0161-1 (Hawk No. 1) – 19 petrographic thin sections of core (2,076'-2,090'; and 8,345'-8,373'),

ARCO Alaska Inc. OCS-0211-1 (Yakutat No. 1) – 34 petrographic thin sections of core (7,576'-17,802'),
Chevron USA, Inc. OCS Y-0243-1 (Falcon Prospect No. 1) – 10 petrographic thin sections of Core No. 5 (4,616'-4,628'),

Phillips Petroleum Company OCS Y-0124-1A (South Arch No. 1) – 2 petrographic thin sections of core (7,091' & 7,093'), and

Phillips Petroleum company OCS Y-0152-1 (Bowhead) – 21 petrographic thin sections of core (9,766'-9,775'; 11,486'-11,496'; and 11,870'-11,880').

3. The GMC received 6 pallets of iron-titanium-platinum core from the **Bristol Bay Native Corporation Kemuk Mountain Prospect**, Nushagax Basin, Southwest Alaska; representing 8,338 feet of core from 14 holes.

4. The GMC received the following **Data Report**:

No. 354: XRF Analyses of Husky Oil NPR Operations Inc. (U. S. Geological Survey) Walakpa Test Well No. 1, Core No. 5 (2,037.3', and 2,038.3').

5. The GMC received on 16 September from the U. S. **Bureau of Land Management** two 40' metal containers. Shortly later, the GMC also received from **BLM** enough metal shelving to shelf these two containers and the earlier container donated by the **Calista Corporation**. This donation helps add critical back-up storage space to the facility that had been used just over the summer. Such donations are critical for the never ending growth needs of the facility! THANKS!!!

6. The GMC had **289** telephone or written contacts during the reporting period. There have been **55** visitations to the GMC since August 31 2008, including representation from:

SUBJECT: Monthly Report – October

1. The Alaska Geologic Materials Center (GMC) received from the **Alaska Oil and Gas Conservation Commission** the following oil/gas exploratory well samples:

Teak Comico Alaska NB-04 cuttings (107'-2,403').

2. The GMC received the following processed materials from industry:

BP Exploration (Alaska) Inc. Milne Point Unit KR C-01 – 4 petrographic thin sections of core (8,902.5' - 8,955'),

ConocoPhillips Alaska Inc. Cirque No. 3 – 7 petrographic thin sections of core (6,126' - 6,205'),

ConocoPhillips Alaska Inc. Meltwater North No. 1 – 11 petrographic thin sections of core (5,615' - 5,704'),

Gulf Oil Corporation Colville Delta State No. 1 – 2 petrographic thin sections of core (7,659' - 7,668'),

Husky Oil NPR Operations Inc. (U. S. Geological Survey) Drew Point – 1 petrographic thin section of core (6,983.5'), and

Husky Oil NPR Operations Inc. (U. S. Geological Survey) East Simpson No. 1 – 2 petrographic thin sections of core (6,710' - 6,728').

3. Alaska GMC received the following Data Report:

No. 355: Bristol Bay Native Corp iron, titanium, platinum Kemuk Mountain Prospect; data on 8,338' of core from 14 holes, Nushagax Basin in Southwest Alaska, Dillingham District, Alaska.

4. The GMC had **291** telephone or written contacts during the reporting period. There have been **54** visitations to the GMC since 30 September 2008, including representation from:

Aeon Biostratigraphic Services (Anchorage)

Anadarko Petroleum Corporation (Houston, Texas)

Calista Corporation (Anchorage)

ConocoPhillips Alaska Inc. (Anchorage)

SUBJECT: Monthly Report – December

1. The Alaska GMC received from **BP International Limited** (Mitcheldean, Gloucestershire, UK) the following supplemental samples:

BP Alaska Inc. Milne Point Unit KR N-01 core chips (3,337.1’-3,374.2’ and 3,424.1’-3,433.6’).

2. The Alaska GMC received the following Data Report:

No. 357: Thin Section and Scanning Electron Microscopy summary photographs from plugs taken from core of the Union Oil Company of California Trading Bay Unit M-29 (11,481.1’-11,511.0’), along with photographs of the original core (Marathon Collection at the Alaska GMC) before and after plugging.

3. The GMC had **141** telephone or written contacts during the reporting period. There have been **30** visitations to the GMC since 30 November 2008, including representation from:

Aeon Biostratigraphic Services (Anchorage)
ConocoPhillips Alaska Inc. (Anchorage)
IRF Group, Inc. (Anchorage)
Petro-Canada (Calgary, Alberta, Canada)
Simmon Frazer University (Vancouver, B.C., CANADA)
Traditional Archers of Alaska (Anchorage)
