

**DESCRIPTION OF MAP UNITS**

- Snow avalanches - Significant potential for snow avalanches based on the presence of steep topography.
- Naleds - Area susceptible to winter buildup of thick seasonal icing sheets (naleds).

**DESCRIPTION OF MAP SYMBOLS**

- - - - - Definitely active fault - Clear evidence of movement during the past 10,000 years; solid where location is known, dashed where approximately located, dotted where inferred.

**PERMAFROST**

Perennially frozen ground is transitional from discontinuous to sporadic in this quadrangle.
