Major Faults

Thrust Fault Sawteeth on upper (tectonically higher) plate

- Identity and existence certain, location accurate
- Identity and existence certain, location inferred

Strike-Slip Fault, Right-Lateral Offset Arrows show relative motion

- Identity and existence certain, location accurate
- Identity and existence certain, location approximate
- Identity and existence certain, location inferred

Geothermal Resources

Thermal Springs

- Surface temperature unknown
- Surface temperature 50°C or lower
- Surface temperature higher than 50°C

Thermal Wells

- Surface temperature 50°C or lower
- Surface temperature higher than 50°C

Heat Flow

- Geothermal gradient test hole (range of heat flow values in milliwatts/meter^2 shown for individual wells)

- Populated place
- Exploration well
- Major road
- Trans-Alaska Pipeline System
- Gas field
- Oil field
- Coal field or province

Sedimentary Basins Contoured in thicker portions of basins

- Onshore Tertiary sediment
- Offshore Tertiary sediment
- Moderately folded sedimentary basins of mostly Mesozoic age

Bouguer Gravity

- In milligals; hachured in direction of lowest gravity value. Interpreted to represent Cenozoic basin fill in 1 to 3 km range

Sedimentary Basin Isopach

- Contours in kilometers. All Cenozoic in age except for basin deposits in North Slope that are Mississippian and younger
- Edge of mapped area
