

DD	Delta, distributaries, many distributed stream segments.
Pd	Poorly drained area, many first order streams and small lakes.
L	Lake.
(solid line)	Stream with non-glacial source, water usually clear.
G	Stream with glacial source, water usually turbid.
T	Stream with non-glacial source, water usually turbid.
(dotted line)	Interpreted stream course through lake basin.
(dashed line)	Interpreted stream course through glacier.
Brd	Braided stream where the boundaries define the limits of the active braided flood plain.
1,2,3,4...	Stream order numbers based on the Horton/Strahler system.
1st Order Stream	Smallest stream without tributaries mapped in the drainage network.
2nd Order Stream	Stream below the confluence of two first order streams.
3rd Order Stream	Stream below the confluence of two second order streams.
4th - ?	etc.
(dashed line)	Subregional USGS designated watershed boundary.
(dotted line)	Accounting Unit USGS designated watershed boundary.
▲	Continuous record gaging station.
△	Partial record gaging station.
Hydrologic Unit number (breakdown as shown below):	
Region	Accounting Unit
19	03 00
Subregion
