

- DD Delta distributaries, many distributed stream segments.
  - Pd Poorly drained area, many first order streams and small lakes.
  - L Lake.
  - Stream with non-glacial source, water usually clear.
  - G Stream with glacial source, water usually turbid.
  - T Stream with non-glacial source, water usually turbid.
  - Interpreted stream course through lake basin.
  - Interpreted stream course through glacier.
  - Brd Braided stream where the boundaries define the limits of the active braided flood plain.
  - 1,2,3,4... Stream order numbers based on the Horton/Strahler system.
  - 1st Order Stream Smallest stream without tributaries mapped in the drainage network.
  - 2nd Order Stream Stream below the confluence of two first order streams.
  - 3rd Order Stream Stream below the confluence of two second order streams.
  - 4th - ? etc.
  - Subregional USGS designated watershed boundary.
  - Accounting Unit USGS designated watershed boundary.
  - ▲ Continuous record gaging station.
  - △ Partial record gaging station.
- Hydrologic Unit number (breakdown as shown below):
- |           |                 |
|-----------|-----------------|
| Region    | Accounting Unit |
| 19        | 03 00           |
| Subregion |                 |
