

- DD Delta distributaries, many distributed stream segments.
 - Pd Poorly drained area, many first order streams and small lakes.
 - L Lake.
 - Stream with non-glacial source, water usually clear.
 - G Stream with glacial source, water usually turbid.
 - T Stream with non-glacial source, water usually turbid.
 - Interpreted stream course through lake basin.
 - Interpreted stream course through glacier.
 - Brd Braided stream where the boundaries define the limits of the active braided flood plain.
 - 1,2,3,4... Stream order numbers based on the Horton-Strahler system.
 - 1st Order Stream Smallest stream without tributaries mapped in the drainage network.
 - 2nd Order Stream Stream below the confluence of two first order streams.
 - 3rd Order Stream Stream below the confluence of two second order streams.
 - 4th - ? etc.
 - Subregional USGS designated watershed boundary.
 - Accounting Unit USGS designated watershed boundary.
 - ▲ Continuous record gaging station.
 - △ Partial record gaging station.
- Hydrologic Unit number (breakdown as shown below):
- | | |
|-----------|-----------------|
| Region | Accounting Unit |
| 19 | 03 00 |
| Subregion | |
