This map has been completed using the best information available and is believed to be accurate. However, it is compiled on a projection, and ground subsidence from a tsunamigenic earthquake may vary from those assumed, so the accuracy cannot be guaranteed. Areas permanently flooded and impact of subsidence and loss of ground contacts and may differ from those shown on the map. Information on this map is intended to provide a rough estimate of post-earthquake response. The map is not appropriate for site-specific evaluation and interpretation of the map(s) by qualified experts is strongly recommended.

POTENTIAL MAXIMUM PERMANENT FLOODING, KING COVE, ALASKA

by E.N. Suleiman, J.J. Nicolsky, J.T. Freymueller, and R.D. Koehler

2018

Projection:
Alaska State Plane Zone 7 (Feet)

Datum: North American Datum of 1983
