The map has been completed using the best information available and is believed to be accurate; however, no representations are made. Actual conditions during a tsunami may vary from those estimated, so the accuracy cannot be guaranteed. Areas inundated will depend on specifics of the earthquake, any earthquake-triggered landslides, on-land construction, tide level, local ground subsidence, and may differ from the areas shown on the map. Information on this map is intended to permit state and local agencies to plan emergency evacuation and tsunami response actions. The map is not appropriate for site-specific use or for land-use regulation. Interpretation of the tsunami inundation maps by qualified experts is strongly recommended.

This report was funded by Awards #NA16NWS4670030 and #NA17NWS467006 by a National Tsunami Hazard Mitigation Program grant to the University of Alaska Fairbanks and Alaska Division of Geologic & Geophysical Surveys from the Department of Commerce/NOAA.

This does not constitute an endorsement by NOAA.
