Report of Investigations 86-21  
MINING-CLAIM INFORMATION FOR THE  
LIVENGOOD QUADRANGLE, ALASKA (1985)  
Revised April 1986

By  
Alfred G. Sturmann

STATE OF ALASKA  
Department of Natural Resources  
DIVISION OF GEOLOGICAL & GEOPHYSICAL SURVEYS

According to Alaska Statute 41, the Alaska Division of Geological and Geophysical Surveys is charged with conducting 'geological and geophysical surveys to determine the potential of Alaskan land for production of metals, minerals, fuels, and geothermal resources; the locations and supplies of ground water and construction materials; the potential geologic hazards to buildings, roads, bridges, and other installations and structures; and shall conduct such other surveys and investigations as will advance knowledge of the geology of Alaska.'

In addition, the Division of Geological and Geophysical Surveys shall collect, record, evaluate, and distribute data on the quantity, quality, and location of underground, surface, and coastal water of the state; publish or have published data on the water of the state and require that the results and findings of surveys of water quality, quantity, and location be filed; require that water-well contractors file basic water and aquifer data, including but not limited to well location, estimated elevation, well-driller's logs, pumping tests, flow measurements, and water-quality determinations; accept and spend funds for the purposes of this section, AS 41.08.017 and 41.08.035, and enter into agreements with individuals, public or private agencies, communities, private industry, and state and federal agencies; collect, record, evaluate, archive, and distribute data on seismic events and engineering geology of the state; and identify and inform public officials and industry about potential seismic hazards that might affect development in the state.

DGGS offices are located at:

.794 University Ave. (Basement) Fairbanks, 99709 (907)474-7147	.3601 C St. (8th fl.) P.O. Box 7028 Anchorage, 99510 (907)561-2020
.400 Willoughby Center (3rd fl.) Juneau, 99801 (907)465-3400	.Fish Hatchery Road P.O. Box 772116 Eagle River, 99577 (907)688-3555

This report is for sale by DGGS for \$3. DGGS publications may be inspected at the following locations. Mail orders should be addressed to the Fairbanks office.

MINING-CLAIM INFORMATION FOR THE LIVENGOOD  
QUADRANGLE, ALASKA (1985)  
Revised April 1986

By  
Alfred G. Sturmann<sup>1</sup>

DESCRIPTION

This report represents the results of a cooperative effort between the Alaska Division of Mining (DOM) and the Alaska Division of Geological and Geophysical Surveys (DGGs). The DOM office in Fairbanks serves as a repository for state and federal mining-claim information in Alaska. These records are maintained as a historical and current data base that provides a centralized source of claim information. The records are updated monthly from recorded documents, claim-location notices, affidavits of annual labor, and deeds received from the 34 recording districts in the state. The records have been used extensively by the mining industry, legal firms, native corporations, professional geologists, and state and federal agencies since 1953. This service was originally part of the Division of Geological and Geophysical Surveys, but became part of the Division of Mining in February 1984.

Claim information is organized by U.S. Geological Survey quadrangle maps (1:250,000) and is cross-indexed by owner, claim, and geographic location. The information is entered on a Kardex file system, then compiled into a semiautomated MINFILE that generates microfiche that are available at DOM offices in Juneau, Ketchikan, and Anchorage.

The Kardex file numbers shown on sheets 1 and 2 are assigned to each claim or claim group and to the documents of each claim holder by the DOM staff. The Kardex file contains a history of all actions that pertain to a specific claim or claim group.

Tables 1 and 2 list Kardex numbers referenced to geographic location for the Livengood Quadrangle (sheets 1 and 2). Table 3 lists geographic locations referenced to Kardex numbers for the Livengood Quadrangle.

ACKNOWLEDGMENTS

This project was completed with the assistance of the staff of the Fairbanks Mining Information Office. Their contribution is gratefully appreciated. Special thanks are extended to Carole Stevenson and Mildred Brown, who aided in researching mining-claim documents. I appreciate the review of the report by V.L. Reger (DGGs) and Brown (DOM).

---
