

MAP UNITS, IPEVIK RIVER

- 1 = low magnitude - high frequency flooding
- 2 = intermediate magnitude - intermediate frequency flooding
- 3 = high magnitude - low frequency flooding
- 4 = rarely floods, very high magnitude - very low frequency flooding

br = bedrock, non-flood unit

MAP UNITS, KUKUK RIVER

- 1 = low magnitude - high frequency flooding
- 2 = intermediate magnitude - intermediate frequency flooding
- 3 = high magnitude - low frequency flooding
- 4 = rarely floods, very high magnitude - very low frequency flooding

TU = abandoned segments of ancient stream channels, non-flood unit
 CP = coastal plain materials, non-flood unit

FLOOD HAZARD POTENTIAL, KUKUK AND IPEVIK RIVERS, ALASKA
