

EXPLANATION

•363 Au, Ag, Zn, Cu, Pb, Co, Ba, W, Mo, Sn, As, Ni, Bi, Sb

Float rock localities anomalous or highly anomalous (underlined) in gold, silver, zinc, copper, lead, cobalt, barium, tungsten, molybdenum, tin, arsenic, nickel, bismuth and antimony

•275 Au, Ag, Zn, W  
 279 •282

All samples within dashed lines are anomalous or highly anomalous (underlined) in elements indicated

Appendix A contains analytical results

Contour interval 100 feet

Figure 8. - Porcupine Mining Area showing float rock sample localities with anomalous values of one or more of the following elements: Gold, silver, zinc, copper, lead, barium, tungsten, molybdenum, tin, arsenic, nickel, bismuth and antimony

Base adapted from U.S.G.S. 1:62,500 scale Skagway (8-3 & 8-4) Quadrangles.
