

MAP SHOWING OCCURRENCES OF ANTIMONY MINERALS IN ALASKA

Compiled by Edwin L. Cruz and Edward H. Cobb

REFERENCE LIST

The publications listed below provide information about localities where stibnite, tetrahedrite, and (or) other antimony minerals have been found in Alaska. The references for each occurrence are keyed to the numbered localities on the accompanying map. An asterisk (*) preceding a locality name indicates recorded production. In most instances, the report(s) cited for each occurrence is a summary of data in older reports and was compiled since 1975; the information supplied is current as of November 1, 1983. Citations are in standard bibliographic format with the exception that each includes, in parentheses, an abbreviation for the report or map series and the number of the report or map. Abbreviations used are: AOF, Alaska Division of Geological and Geophysical Surveys Open-File Report; BMOF, U.S. Bureau of Mines Open-File Report; MF, U.S. Geological Survey Miscellaneous Field Studies Map; OF, U.S. Geological Survey Open-File Report.
