

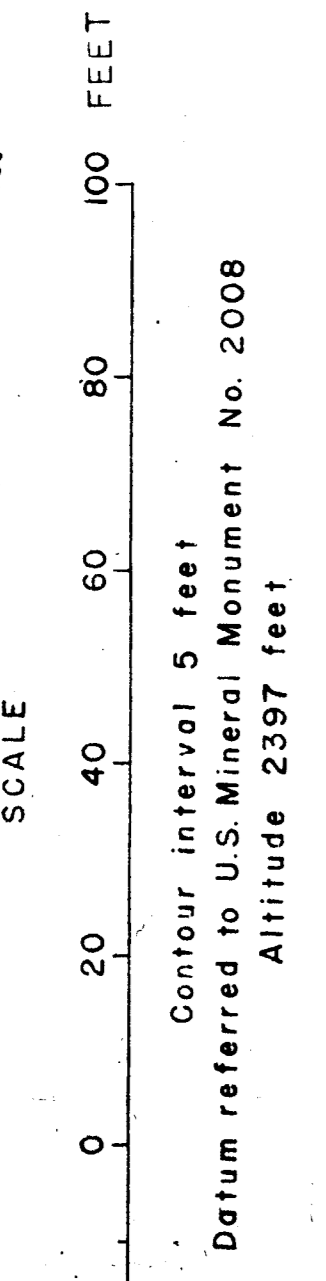

FIG. 6
LOGIC MAPS OF BULLDOZER TRENCHES 4-14
ON
STEPOVICH LODE, GILMORE DOME

These maps are preliminary and have not been checked or approved by the Geological Survey standards and nomenclature.

EXPLANATION

- STRATIFIED ROCKS**
- Siltified schist
 - Quartzite-schist and metabasite schist
 - Crystalline limestone
- INTRUSIVE ROCKS**
- Silicified rock
 - Quartzite-schist, quartzite, felspar porphyroblast
- ECONOMIC GEOLOGY**
- Scheelite ore
 - Silicified schist and metabasite rocks (specimens of dots roughly proportional to grade)
 - Location, name, and number of mines (No. of Bureau of Mines channel sample cut across ore zone (in brackets) (Geological Survey sample))
 - Number of Bureau of Mines trench
 - Bureau of Mines pit
 - Strike and dip of bedding (horizontal)
 - Strike and dip of prominent fractures
 - Strike and dip of fault (dashed where inferred)
- For relative position of trenches see fig. 4
Geology exposed in trenches and pits, profile of surface through bottom of trench
