GEOLOGIC MAP OF THE EAGLE LAKE DAMSITE

FIGURE 10

EXPLANATION

SURFICIAL DEPOSITS

Qc

Colluvium and soil cover

UNCONFORMITY

METAMORPHIC ROCKS

gn

Composite gneiss

Biotite and hornblende biotite gneiss interlayered with gneissic quartz diorite. Foliation symbols shown in cross section are predominantly schematic

QUATERNARY

PALEOZOIC TO LOWER JURASSIC

Approximate contact

Strike and dip of foliation

Strike and dip of joints

Strike of vertical joints

Possible axis line and line of cross section

Sample locality
