

LEGEND

PREDOMINANT LITHOLOGY

- Graywacke, mudstone, and conglomerate; minor pillow basalt, breccia and volcanoclastic sedimentary rocks.
- Conglomerate containing mafic volcanic, sedimentary & plutonic rock clasts and reddish sandstone; festoon cross bedded, carbonate cemented; minor platy limestone.
- Limestone, generally bioclastic
- Prominent basaltic and andesitic lavas including pillow basalt, breccia and tuff.
- Highly calcareous argillaceous and sandy rocks.
- Felsic volcanic rocks.
