Geological Survey published reports on Alaska, 1960-1973,

indexed by quadrangle

By Edward H. Cobb

Introduction

Geological Survey reports published as Professional Papers, Bulletins, Water Supply Papers, Circulars, and in the Journal of Research, are listed by the quadrangles (scale 1:250,000) into which Alaska has been divided for topographic mapping (p. 2). This index does not include reports that deal only with administrative matters or that were placed in open files but not formally published.

Reports that deal with Alaska as a whole, with areas that can not be identified with any specific quadrangle, or with offshore areas that are not within quadrangle boundaries, or that consist mainly of statistical data on the quality or quantity of water are listed under ALASKA-GENERAL, as are bibliographies, lexicons, and similar publications. The ALASKA - GENERAL list appears before the alphabetically arranged quadrangle listings.

This index is the fifth in a series of specialized lists, arranged by quadrangle, that will facilitate library research on the geology and mineral resources of Alaska. Previously released in the series are:

Cobb, E. H., 1974, Geological Survey open-file reports on Alaska indexed by quadrangle: U.S. Geol. Survey open-file report 74-7, 116 p.

——— 1974, Selected U.S. Bureau of Mines reports on Alaska indexed by quadrangle: U.S. Geol. Survey open-file report 74-52, 40 p.

——— 1974, Geological Survey maps (other than topographic) of Alaska indexed by quadrangle: U.S. Geol. Survey open-file report 74-84, 38 p.

——— 1974, Reports of the Alaska Division of Geological and Geophysical Surveys and predecessor agencies, 1913-1973, indexed by quadrangle: U.S. Geol. Survey open-file report 74-209, 112 p.

Map showing quadrangles of Alaska Topographic Series (1:250,000)
