

MAP OF ALASKA

Compiled under the direction of R. U. Goode, Geographer,
by E. C. Barnard and others.

1908
Scale 1:5,000,000
Approximately 40 miles to 1 inch.
Contour interval 1000 feet.
Datum to mean sea level.
1904

Note: The shaded areas in the above diagram are those which have been mapped by the Geological Survey and on which the map of Alaska within the coast line is principally based. The map of the coast and interior survey of the southeastern Alaska and along the coast of the Gulf of Alaska, covering by the greater portion of the map, has not been surveyed, and the topographic features shown in these localities are based upon such general information as could be gathered.
