

- EXPLANATION
- Number of specimens (See Scale 10)
 - Common specimens (10-50)
 - Abundant specimens (20-50)
 - Very abundant specimens (more than 50)
 - Fragment
 - Present
 - Questioned occurrence
 - Drilling contamination from Gakub Formation
 - Drilling contamination from Foraminifera-bearing interfacial zone
 - Drilling contamination from Chert nodules
 - Drilling contamination from Turbidite
 - Shales
 - Not sampled
 - No recovery
