

Driller's logs are on file for all wells except those indicated by an asterisk. All altitudes preceded by "m" were estimated from a recent topographic map. All others were determined by survey or altimeter. All wells were drilled except 46 and 90, which were bored and 79, which was drilled. Use of water is indicated as follows: Dom., industrial; Obs., observation; P.S., public supply; Loc., observation well equipped with an automatic recorder and log; Irr., irrigation. Yield of wells is in gallons per minute. The earthquake magnitude, other than those recorded in observation wells, are based on overfilled information provided by owners, residents, and drillers.

WELL NO.	WELL LOCATION	OWNER	DRILLER	DATE DRILLED	ALTITUDE (feet)	DEPTH (feet)	DIAMETER (inches)	USE	WATER-LEVEL DATA			EARTHQUAKE EFFECTS
