The National Geospatial
Technical Operations Center:
Products, Services, and
Operational Support

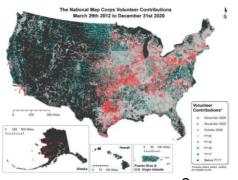

Alaska Geospatial Summit October 2023
Kim Mantey
Director, National Geospatial Technical Operations
Center

National Geospatial Technical Operations Center

- Geospatial Center of Excellence supporting the National Geospatial Program, the civilian mapping agency.
- Extensive collaboration with over 260 partners including 18 Federal agencies and 249 state and local governments for acquisition, management and maintenance of geospatial data.
- An offsite suite of 10 prime contractors with numerous subcontractors under the Geospatial Product and Service Contract (GPSC) provide capacity of geospatial services in support of NGP's national acquisition programs.
- The Center manages over 3.5 Petabytes of geospatial data stored locally and on the cloud.
- Demand for products and services is high with over 462 million hits per month on data download, services, and applications.
- Run the "National Map Corp," a crowdsourcing effort. Over 5,500 volunteers have collected over 412,000 unique map features to contribute to NGP's data holdings.
- The National Map is the comprehensive data source for accessing viewing and downloading geospatial data assets and includes foundational, national data including Hydrography, Elevation, Transportation, Structures, Boundaries and Geographic Names

National Geospatial Technical Operations Center

<u>Delivery of nationally consistent, authoritative geospatial data and derived</u> <u>products and services</u>

- Acquisition of geospatial data (via Federal/state and local partners, contractors, and Center staff)
- ➤ Maintenance and management of national level databases:
 - Geographic Names, Hydrography, Elevation, and Boundaries, Man-made Structures, and Transportation
- ➤ Data validation and data integration
- ➤ Technical support and training
- >Standards development and maintenance
- ➤ Applied geospatial research
- ➤ Systems and software tool development
- ➤ Data delivery of products/services
- ➤ Research Center of Excellence for Geospatial Information Science (CEGIS)

Geospatial Products and Services Contract (4)

- \$850M Cap over 5-years, 10 prime contractors (and subcontractors)
- Services to be procured
 - Acquisition of remotely sensed data from multiple platforms
 - Lidar, radar, imagery, electromagnetic and geophysical data
 - High resolution topographic and geophysical data and map products
 - Feature extraction from remote sensing data (hydrography, buildings, etc.)
 - Emergency acquisition and geospatial product generation for disaster response
 - Survey and control services including cadastral surveying
 - Geographic Information Systems (GIS) analysis
 - Validation of provided geospatial data and products

Over 300 Partners Including Federal, State, and Local

3D Elevation Program (3DEP)

3D Elevation Program

National Geospatial Program

3D Elevation Program (3DEP) Data Lifecycle

Acquisition **Validation Publication Planning** Access Federal, state, tribal, USGS validates data USGS makes 3DEP data Users can download Contractors acquire local or private entities & produces standard publicly available on data or work directly and process data partner on an area of on USGS visualization 3DEP data products The National Map & via interest services in the Cloud platforms USGS and/or partners plan the project & award a task order USGS currently manages over 28.5 trillion lidar points or ~87,000 per person in the US

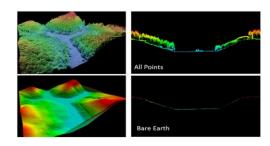

Why does this matter?

The goal of 3DEP is to complete acquisition of nationwide lidar (IfSAR in AK) by 2023 to provide the first-ever national baseline of consistent high-resolution topographic elevation data.

What is the return on investment?

Completion of national 3DEP coverage could conservatively provide annual benefits of \$690 Million to a broad range of critical applications.

Credit: U.S. Geological Survey

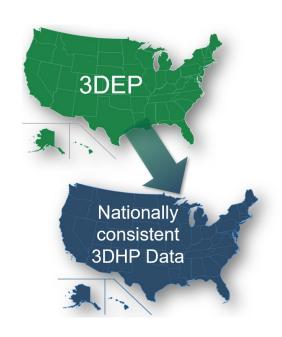

- Congressionally mandated to map and provide elevation data for the entire United States
- Over 300 Federal, State and local partners
- Oversee the entire lifecycle of data, from planning to publication
- Multiple active remote sensing technologies
- Has gone from a baseline of QL2 (2 points per square meter) to increased demand to QL1 (8 points per square meter)

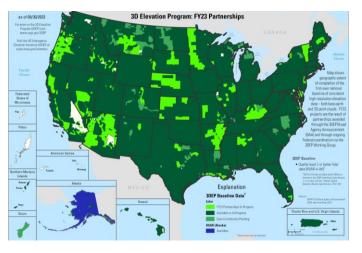

3D Hydrography Program

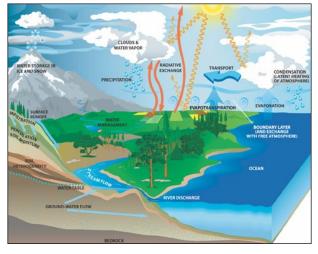

Align vertically, horizontally, and temporally with 3D Elevation Program (3DEP) data

- Replace existing older, inconsistent data with higher accuracy hydrography derived from 3D Elevation Program (3DEP) lidar
- Follow 3DEP Best Practices
 - Governance
 - Add 3DHP to the 3DEP Data Collaboration Announcement (DCA)
 - Contract 3DHP data through the USGS Geospatial Products and Services Contracts
 - Allow for co-operative data acquisition
 - Specifications and data validation
- Data and systems built for hydrologic applications
- Better accounting of the hydrologic cycle through connections to groundwater, U.S.
 Fish and Wildlife Service National Wetlands Inventory, and engineered hydrography
- Interoperability with other data such as surficial geology, soils, landcover, transportation networks, and other infrastructure

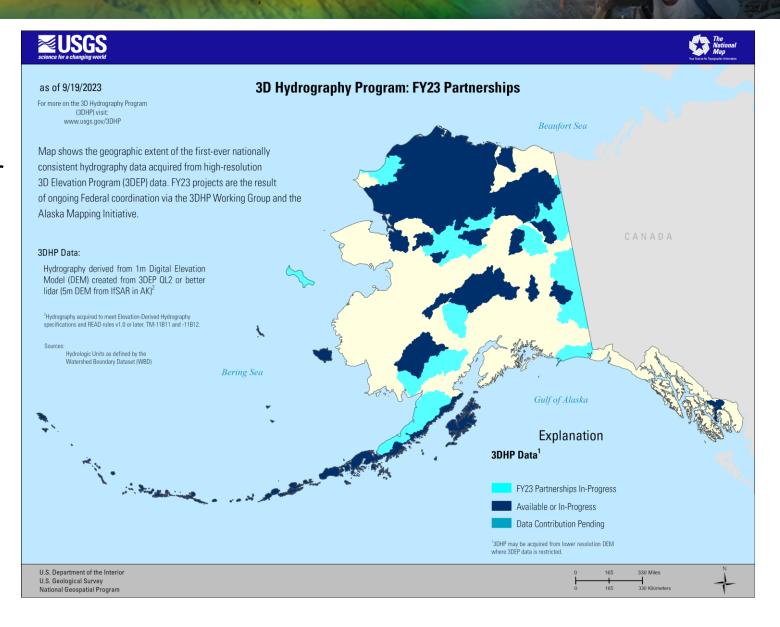

3DEP Status – on track to complete nationwide coverage by 2026

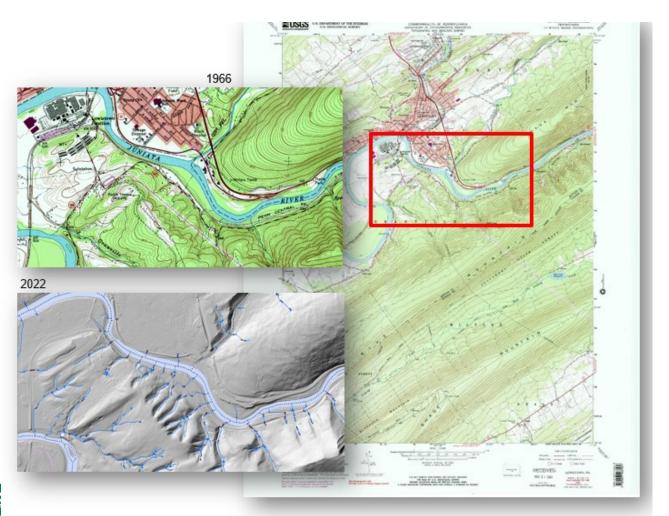

3D Hydrography Program Acquisition in FY 2023

- USGS Alaska Mapping funds support ongoing data acquisition - data in progress or planned for over 63 percent of the State
- ~230K sq miles available or in progress through FY22
- 88K sq miles added in FY23
- FY24 projected ~60K sq miles

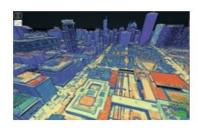

Cartographic Services: Current and Upcoming Products

- Three year refresh cycle over entire country over 18,000 new standard quadrangle maps each year!
 - Maps built from updated source data (elevation, hydrography, transportation, structures, boundaries
- Upcoming fiscal year plans: Over 1,000 updated 7.5 minute quads in Alaska
- Congressional mapping custom congressional district maps
- New products dynamic mapping

The National Map Delivery

- TNM Delivery System is an enterprise capability that supports all NGP Products and Services.
 - 3DEP, Hydrography, Topographic Mapping, Geographic Names, Transportation, Boundaries, Structures, orthimagery, land cover over 100 different product types
- Provides: Search, Viewing, Download, Metadata, Web Services, <u>Basemaps</u>
 Caches, Cloud optimized formats, Notifications about map services, On Demand Elevation Derivatives, Product Availability Indexes
- Future of Delivery:
 - Enhanced use in place to avoid download of very large data
 - Support for bulk delivery and auto-sync to put data on other hosting platforms
 - On Demand Dynamic Topographic Maps
 - Semantic based search at feature level
