

AKUMWARVIK BAY TRAVERSE

SECTION II, T.13S., R.29 W., SM.

JURASSIC NAKNEK FORMATION

NOTE: The sandstone depicted here is one of many such tabular sandstones exposed in prominent cliffs along Akumwarvik Bay. Evidence suggests deposition was in a shallow marine linear clastic shoreface environment.

LABORATORY DATA		
Sample Number	Porosity	Permeability
67A-WL-76	9.4	5.83
67B-WL-76	10.3	13.00
71 -WL-76	6.9	.02
76 -WL-76	6.2	.02
Average	8.2%	4.2 Md.
