# RADIOMETRIC AGE MAP OF ALASKA

by

Frederic H. Wilson<sup>1</sup> and Donald L. Turner<sup>2</sup>

This map includes published, thesis, and open-file radiometric data available to us as of June, 1975. Some dates are not plotted because of inadequate location data in the original references.

The map is divided into five sections, based on 1:1,000,000 scale enlargements of the National Atlas maps of Alaska. Within each section (e.g., southeastern Alaska), radiometric dates are plotted and keyed to 1:250,000 scale quadrangles. Accompanying each map section is table 1, listing map numbers and the sample identification numbers used in DGGG Special Report 10: Radiometric Dates from Alaska—A 1975 Compilation<sup>3</sup>. The reader is referred to Special Report 10 for more complete information on location, rock type, dating method, and literature references for each age entry. A listing of dates in Special Report 10 which require correction or deletion is included as table 2. Corrected and additional entries are listed in table 3. The listings in tables 2 and 3 follow the format of Special Report 10. Table 4 is a glossary of abbreviations used for quadrangle name, rock type, mineral dated, and type of dating method used.

The authors wish to thank the Alaskan Geology Branch of the U.S. Geological Survey for partial support of this project. Thanks are also extended to F.H. Weber of the U.S. Geological Survey, R.B. Forbes of the University of Alaska Geophysical Institute and Geology Dept., and T.E. Smith of DGGG for their assistance and encouragement.
