

Geology from U.S.G.S. Map I-411

- 1 Biotite-hornblend tonalite, olivine, hornblende-clinopyroxene gabbro, biotite-hornblende diorite and minor biotite-hornblend granodiorite.
- 2 Triassic phyllite, quartzite, greenschist, greenstone, graywacke and graywacke semischist.
- 3 Triassic phyllite with lesser quartzite, greenschist, greenstone, and metachert.
- 4 Triassic greenschist and greenstone with lesser phyllite, graywacke, semischist and metachert.
- 5 Jurassic biotite schist and gneiss with lesser amphibolite, quartzite, phyllite and hornfels.
- 6 Hornblend-biotite tonalite, grading into subordinate hornblend-biotite granodiorite
