

Data from U.S. Geological Survey, Seismicity, C-4, 1985, C-6, 1978, Seismicity, B-4, 1975, B-5, 1975, Washington, Alaska

LOCATION INDEX

TOTAL MAGNETIC FIELD OF THE COUNCIL AREA, SEWARD PENINSULA, ALASKA PARTS OF BENDELEBEN AND SOLOMON QUADRANGLES 2003

DESCRIPTIVE NOTES

The geophysical data were acquired with a DICEHEM Electromagnetic (EM) system and a Schintex cesium magnetometer. Both were flown at a height of 100 meters. The DICEHEM system consists of a 50/60 Hz radar altimeter, GPS navigation system, 50/60 Hz magnetometer, and video camera. Flights were performed with a clearance of 200 feet along North-South (N-S) survey flight lines with a spacing of a quarter of a mile. The flight lines at intervals of approximately 3 miles. An Ashtech G24 NAVSTAR / GLOMASS Global Positioning System was used for navigation. The helicopter position was derived every 0.5 seconds. The relative accuracy of better than 5 m. Flight path positions were projected onto the Clarke 1866 datum using a central meridian (CM) of 165°, a north constant of 0 and an east constant of 500,000. The datum used for this survey is better than 10 m with respect to the UTM grid.

TOTAL MAGNETIC FIELD

The total magnetic field data were acquired with (1) sampling interval of 0.5 seconds, and were (2) leveled to the base station magnetic data, (3) leveled to the tie line data, and (4) interpolated to 100 m grid. The regional variation (or IGRF (1970) technique. The regional variation (or IGRF gradient, 2000, updated to August 2002) was removed from the leveled magnetic data.

Altitude based on local procedure. Journal of the Association of Computing Machinery, v. 17, no. 4, p. 88-92.

SURVEY HISTORY

This map has been compiled and drawn under contract between the State of Alaska, Department of Natural Resources, Division of Geological and Geophysical Surveys (DGGS), and Stevens Exploration Management Corp. Airborne geophysical data for the area were acquired by Stevens Exploration Management Corp. in 2002. Laurel Burns was the contract manager for DGGS.

This map and other products from this survey are available from the State of Alaska, Department of Natural Resources, Division of Geological and Geophysical Surveys, Suite 200, Fairbanks, Alaska, 99709.
