

DESCRIPTION OF MAP UNITS

- Moderate - A 1:250,000- or 1:125,000-scale geologic map is available; known to be generally reliable because of limited field observations, a few laboratory tests, or both; interpretation of 1:63,000- or larger scale aerial photographs is not verified by field observations.
- Very Good - One or more 1:63,360- or larger scale geologic map is available; verified by numerous detailed field observations, or multiple laboratory tests, or both; interpretation of 1:63,000- or larger scale aerial photographs has considerable field verification.
