NOTES

Grantee: Tununak IRA Council
Type of Easement: 25' Wide Trail Easement
DATE: 4-20-77

INTEREST
DATE: 4-27/01

Tununrmiut Rinit Corp.
IC No. 540
SEC. 28
Bk.26, Pgs.682-687

Please note the following disclosures/use limitations:
- These maps illustrate elevation and are not intended for use in the definition of flood zones. Flood naturally induced, may have occurred that will cause the elevations depicted on these map figures to vary. Elevations intervals on the map are derived from 2015 source data. Temporal changes, human or road or add a seawall, and/or beach and sand spits may have moved since DCRA linework was completed, local engineering projects might raise a
- Vertical and horizontal accuracies vary by location.
- Colors are restricted to areas of known elevation. In some cases the best available elevation may have the following limitations:

VERTICAL AND HORIZONTAL ACCURACIES CAN VARY BY LOCATION.

The Alaska Native Title Board's position is that of a facilitator and not a participant in negotiations relating to the settlement of title. The Alaska Native Title Board has no position as to the negotiation of individual rights, including rights of way. The Alaska Native Title Board's position is that of a facilitator and not a participant in negotiations relating to the settlement of title. The Alaska Native Title Board has no position as to the negotiation of individual rights, including rights of way.
Elevation intervals on the map are derived from 2015 source data. Temporal changes, human or naturally induced, may have occurred that will cause the elevations depicted on these map figures to no longer represent actual surface conditions.

These maps illustrate elevation and are not intended for use in the definition of flood zones. Flood levels are not perfectly flat and will not directly correspond to specific elevations.

Vertical and horizontal accuracies vary by location. Best available data sets in Alaska are not always up-to-date. Examples: Houses or infrastructure may have moved since DCRA linework was completed, local engineering projects might raise a road or add a seawall, and/or beach and sand spits may have naturally changed shape.

Colors are restricted to areas of known elevation. In some cases the best available elevation model does not cover the entire DCRA Community Map area.

Color Key Available as Separate Sheet:

Color indices shown to the left define relative vertical elevations. The vertical magnitude for each colored elevation range varies as shown (i.e. orange encompasses a 2-meter range of elevations that are the lowest elevations mapped). For up-to-date numerical elevation values associated with each colored elevation range, see key on a separate sheet MP 154 version 2 Tununak Numerical Elevation Table.
