MINING ACTIVITIES

Northwestern - The Kennecott Copper Corp. was down 175 feet with its exploratory shaft at Ruby Creek at mid-November. Three crews are working around the clock seven days per week. No unusual difficulties have been encountered thus far in the sinking. A modern, all-enclosed camp has been constructed, and since the establishment of a U.S. post office, the location is known as Bornite. The working force has averaged about seventy-five men through the year.

OIL NEWS

During this month five applications for permit to drill were approved by the Petroleum Branch. They are as follows:

Coal Bay State #1 - Texaco Inc., operator - Surface location 330' south along section line from NW corner, Section 16, T6S-R12W, S.M. Bottom hole location 750' N and 1,000' W from SE corner, Section 8, T6S-R12W, S.M. This location lies in Kachemak Bay east of Homer Spit. It will be drilled this winter with the Polar Cub self-elevating drilling barge. The hole is being deviated because there is insufficient operating water depth directly above the bottom hole location.

Rainbow-Federal #1 - Atlantic Refining Company, operator - 491 FWL and 2417 FSL, Section 31, T8N-R5W, C.R.M. This location lies in the general area of Lake Louise. It will test a 189,000 acre block of Federal acreage recently taken by Atlantic and held under the Rainbow Development Contract.

M.G.S. State A-4-6 - Shell Oil Company, operator - Surface location 1627' N and 435' W of SE corner, Section 11, T8N-R13W, S.M. (conductor #6). Bottom hole location 1980' W and 1980' S of NE corner, Section 14, T8N-R13W, S.M. This is the fourth development well drilled from Shell's platform "A".

OLL NEWS (Continued)

U.S.A. Edna May Walker #1 - Pan American Petroleum Corp. snembiscod operator 150 1980' FSL and 1980' FEL. Section 350 T150 R120 Generator This location lies about 13 miles east of Ninilchik.

Lorraine State #1 - Atlantic Refining Company, operator - 550' FNL and 1623.6' FEL, Section 21, T14N-R4W, S.M. This location lies on State acreage formerly in Pale 861 just west of Lake Lorraine.

Year-around offshore drilling to commence this year - This year will mark the first time that offshore drilling equipment will be utilized on an annual basis in Alaska Texago, Inc. 3 Coal Bay State #1 will be drilled this winter in Kachemak Bay. This year-around use of equipment will eltminate the costly idle time during the winter months when jack-upper floating drilling equipment gapnot be used in upper Cooki Inleti bacause of the ice floos . was asves in its add bappar paid. stow been though me thus few in the staking. A manda, all-englosed Contracts for four new permanent drilding and production platforms announced & pRan American Petroleum Corporation and its partners have announced that contracts have been let for permanent drilling and and producing platforms to develop the south end of the Middle Ground Shoal field and Pan Am's portion of the Granite Point field. Union and Marathon have contracted a unique single leg platform to be used in developing and producing their Trading Bay field. Mobil Oil Co. has announced what ab twin rigged permanent drilling; and producing and platform is now being builtwifor their Granite Points field. 191764 1916 VC

Impaddition to the aboverdisted permanent platforms; and 8-legged self-contained mobile drilling platform; the John C. Martens, is presently being modified an Portland for use by the Atlantic Refining Company this coming summer in the Cook, Inlets area. It was a production of the Cook Inlets waters announced that their Company of California and Marathon Oil Company announced that their Grayling #1-A had flowed in excess of 1,000 barrels of oil periday through a 20/64" choke. The A.P.I. gravity of the oil is approximately 36°. The producting, interval is between 9,475 and 9,970 to This well lies about the miles South of Union-Marathon, strading Bay field the Iliv II. See to oxid.

per smerican Petroleum Corporation announced an absolute open flow test rate of 19 million cubic feet of gas per day from their Cook Inlet State 18740 #1. The test was made through perforations between 49,400 and 4,480'. This well is located about a mile and one quarter southwest of the Cook Inlet State #1 drilled in 1960 and 1963. One one of the Cook Inlet State #1 drilled in 1960 and 1963.

The production tests on all these wells were witnessed by the Petroleum Branch of the Division of Mines and Minerals.

OIL NEWS (Continued)

State ownership in Lower Cook Inlet extended, Yakutat Bay case decided for the State of Alaska - The U.S. Court of Appeals in San Francisco reversed a decision by a district court judge and ruled that the State of Alaska has title to the water bottoms of Yakutat Bay. The U.S. District Court had ruled that the State did not possess the water bottoms but this decision was appealed by the State. After the California tidelands decision of the U.S. Supreme Court of May 17, 1965, which ruled that States own water bottoms of bays within closing lines of 24 miles or less, the circuit court ruled for the State of Alaska.

The important effect of this decision is to extend State ownership to the 24-mile headland line in lower Cook Inlet making a greater portion of this area available for oil and gas leasing.

COAL AND OFFSHORE MINING REGULATIONS

Proposed coal and offshore regulation changes - The Division of Lands is proposing amendments and additions to the Alaska Coal Leasing Regulations and the Alaska Mining Rights Regulations, to be considered at a public hearing starting at 9:30 a.m., A.S.T., December 17, 1965, in the office of the Division of Lands, 344 6th Avenue, Anchorage, Alaska.

The proposed changes will affect coal leasing and offshore prospecting permits and leases in that they will provide for a simultaneous filing period for expired permits and ease the survey requirements.

Any interested person may present relevant statements orally, or in writing, at the hearing. Written statements are acceptable prior to the hearing: All statements will be given full consideration before adoption of amended regulations. . "}

Copies of the proposed changes are available from Minerals Officer, State Department of Natural Resources, Division of Lands, 344 6th Avenue, Anchorage, Alaska, 99501. HET BLOOD ALLENDED BY SWALLED

PROPOSED KANTISHNA WITHDRAWAL

The Fairbanks office of the U.S. Bureau of Land Management announced during the month that it would conduct an informal meeting of persons interested to ascertain whether a formal public hearing is warranted on the proposed withdrawal of the Kantishna mining district for the purpose of adding it to Mt. McKinley National Park. The date of this meeting is December 3, 1965. The BLM requested notice from interested persons as to whether they would attend.

PROPOSED WITHDRAWAL (Continued)

As we "go to press", a letter from Secretary Udall to Senator
Bartlett is received in which Mr. Udall assures the Senator "that a
public hearing will be held locally before any withdrawal order
affecting the lands in question is issued". No hearing date is
mentioned. Secretary Udall also states in his letter, "The proposed
withdrawal is for the purpose of retaining the lands in Federal ownership pending completion of comprehensive studies as to the need and
suitability of any of such lands for public facilities in connection
with the management of the Park".

FIRE ASSAY OFFICE OPEN AT COLLEGE

The Fire Assay Office of the Division of Mines and Minerals is now open on the campus of the University of Alaska. Samples submitted for fire assay of gold and silver should be sent to: Division of Mines and Minerals, Fire Assay Office, Box "C", College, Alaska, 99735.

Samples for which more complex analyses are desired should be mailed to our Anchorage laboratory at 3001 Porcupine Drive, Anchorage, and Alaska, 99504.

PROPOSED GOLD MINING ASSISTANCE

We have just received a long detailed letter from Kenneth C. Kellar. Vice President of Homestake Mining Company, describing his efforts with Congress to obtain a subsidy and/or a greater depletion allowance. Three Congressional Bills with which he has been concerned were of attached. Mr. Kellar asks if this Division can contact former Alaskan gold operators and enlist their aid in developing evidence of the effect the bills would have, if passed, in reopening gold properties. For his presentation at probable hearings early next year, he is hoping for information that will include the number of properties which might reopen together with their estimated annual production in ounces at a price of \$79 per ounce (incorporated in one of the bills) and also how many more mines with what annual production would reopen at \$105 per ounce.

We will endeavor to condense the information received from Mr. Kellar and mimeograph it for distribution to those who might help provide the requested data. If you would like to give this matter serious consideration and help provide the estimates that are needed, write to us at Box 1391, Juneau.
