INTRODUCTION

This index was compiled to identify areas of surficial geologic mapping in Alaska and to provide a bibliography of publications that address surficial deposits in at least moderate detail. Source material is confined to publications of the Alaska Division of Geological and Geophysical Surveys and the U.S. Geological Survey. Publications listings were consulted to identify likely titles and the corresponding publications were examined and assessed for degree of detail in the mapping of surficial deposits. This index should not be regarded as comprehensive, for there may be publications containing surficial geologic maps with titles that give no such indication.

Mapped areas from selected publications are shown on Plate 1 and keyed by number to the following numerical and alphabetical listings.
