This map is a graphical representation of the maximum estimated tsunami inundation for the Cordova, Alaska area. The map was created using data from the U.S. Geological Survey (USGS) and the U.S. Navy's Joint Theater Operations Center (JTOC) to estimate the potential extent of tsunami inundation based on historical earthquake scenarios. The map is intended to support emergency planning and preparedness efforts. It is important to note that the map is an approximation and actual inundation could vary in extent and depth. Users of this map should consult local officials and experts for specific guidance on tsunami hazards in the area.
