This report has been completed using the best information available and is believed to be accurate; however, it contains many assumptions. Actual conditions during an event may vary from those shown on the map. This product is for general information purposes only. The map is not appropriate for deterministic risk or for seismic hazard assessment. Interpretation of the tsunami inundation maps by qualified experts is strongly recommended.

MAXIMUM ESTIMATED TSUNAMI INUNDATION, EYAK RIVER, CORDOVA, ALASKA, 2022 UPDATE
