

MAXIMUM ESTIMATED TSUNAMI INUNDATION, JUNEAU, ALASKA
ECHO COVE, BRIDGET COVE, AND EAGLE CREEK DELTA

by D.J. Nicolsky¹, E.N. Suleimani¹, R.D. Koehler², and J.B. Salisbury²

2017

This map has been completed using the best information available and is believed to be accurate; however, its preparation required many assumptions. Actual conditions during a tsunami may vary from those assumed, so the accuracy cannot be guaranteed. Areas inundated will depend on specifics of the earthquake, any earthquake-triggered landslides, on-land construction, tide level, local ground subsidence, and may differ from the areas shown on the map. Information on this map is intended to permit state and local agencies to plan emergency evacuation and tsunami response actions. The map is not appropriate for site-specific use or for land-use regulation. Interpretation of the tsunami inundation map(s) by qualified experts is strongly recommended.
