INTRODUCTION

These bibliographies cite most geological literature published on the Copper River and middle Tanana River basins. The area was the subject of an oil and gas lease sale in August 1982 (figs. 1 and 2). Because of this, petroleum-related entries were emphasized.

The annual bibliographies of E.H. Cobb (U.S. Geological Survey) and the *Bibliography and Index of Geology* (American Geological Institute) were the primary sources for this compilation. No attempt was made to verify information from the original documents.

Corrections and additions are welcomed by the authors.
