

79-837-S  
Figure 1.--Histogram for beryllium in 623 nonmagnetic (at >0.6 ampere) samples of heavy-mineral concentrates from stream sediments, Survey Pass 1° x 3° quadrangle, Alaska, showing map symbols corresponding to anomalous concentrations in parts per million, percentage of total samples, and letters corresponding to non-anomalous concentrations in parts per million. <, detected, but less than value shown. Arithmetic mean, 3.3; standard deviation, 10.4; geometric mean, 2.4; and geometric deviation, 1.6, based on unqualified values within the sample population.

EXPLANATION  
BERYLLIUM SAMPLE SITES--Letters and size of symbols are explained on histogram (fig. 1)  
□ Anomalous  
A Not anomalous

NOTE  
This map is one in a series of geochemical maps concerning the Survey Pass 1° x 3° quadrangle, Alaska. For discussion of analyses and sampling see Cathrall and others, 1979.  
Cathrall, J. B., Cooley, E. F., McDaniel, S. K., and Billings, T. M., 1979, A listing and statistical summary of spectrographic analyses of heavy-mineral concentrates from stream-sediment samples for the Survey Pass quadrangle, Alaska: U.S. Geological Survey Open-File Report 79-837-B.
