

Figure 1. Geologic Map of the Craig Quadrangle, Alaska

This map is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards and stratigraphic nomenclature.

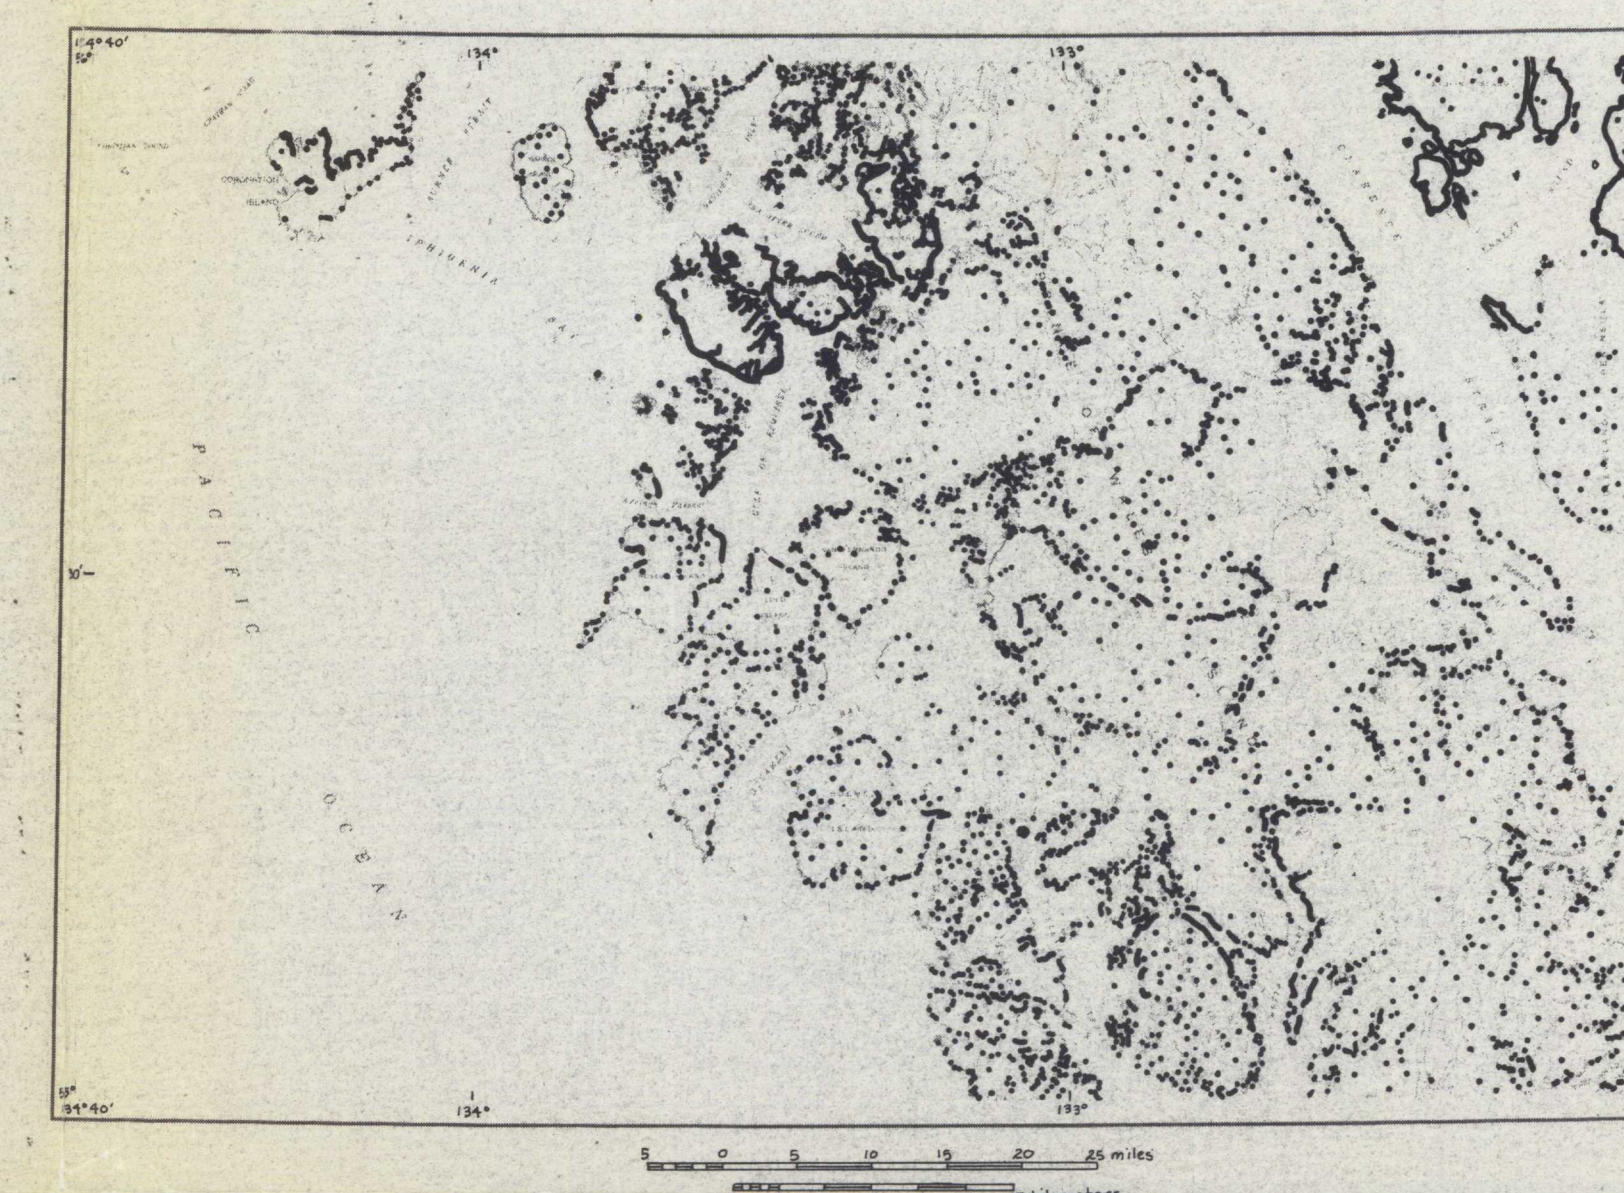

Figure 2. Index map showing location of field observation points. Dots represent field stations. Lines north east of Clarence Strait represent continuous foot traverses. Elsewhere, lines generally represent dots so closely spaced that they coalesce at this scale.

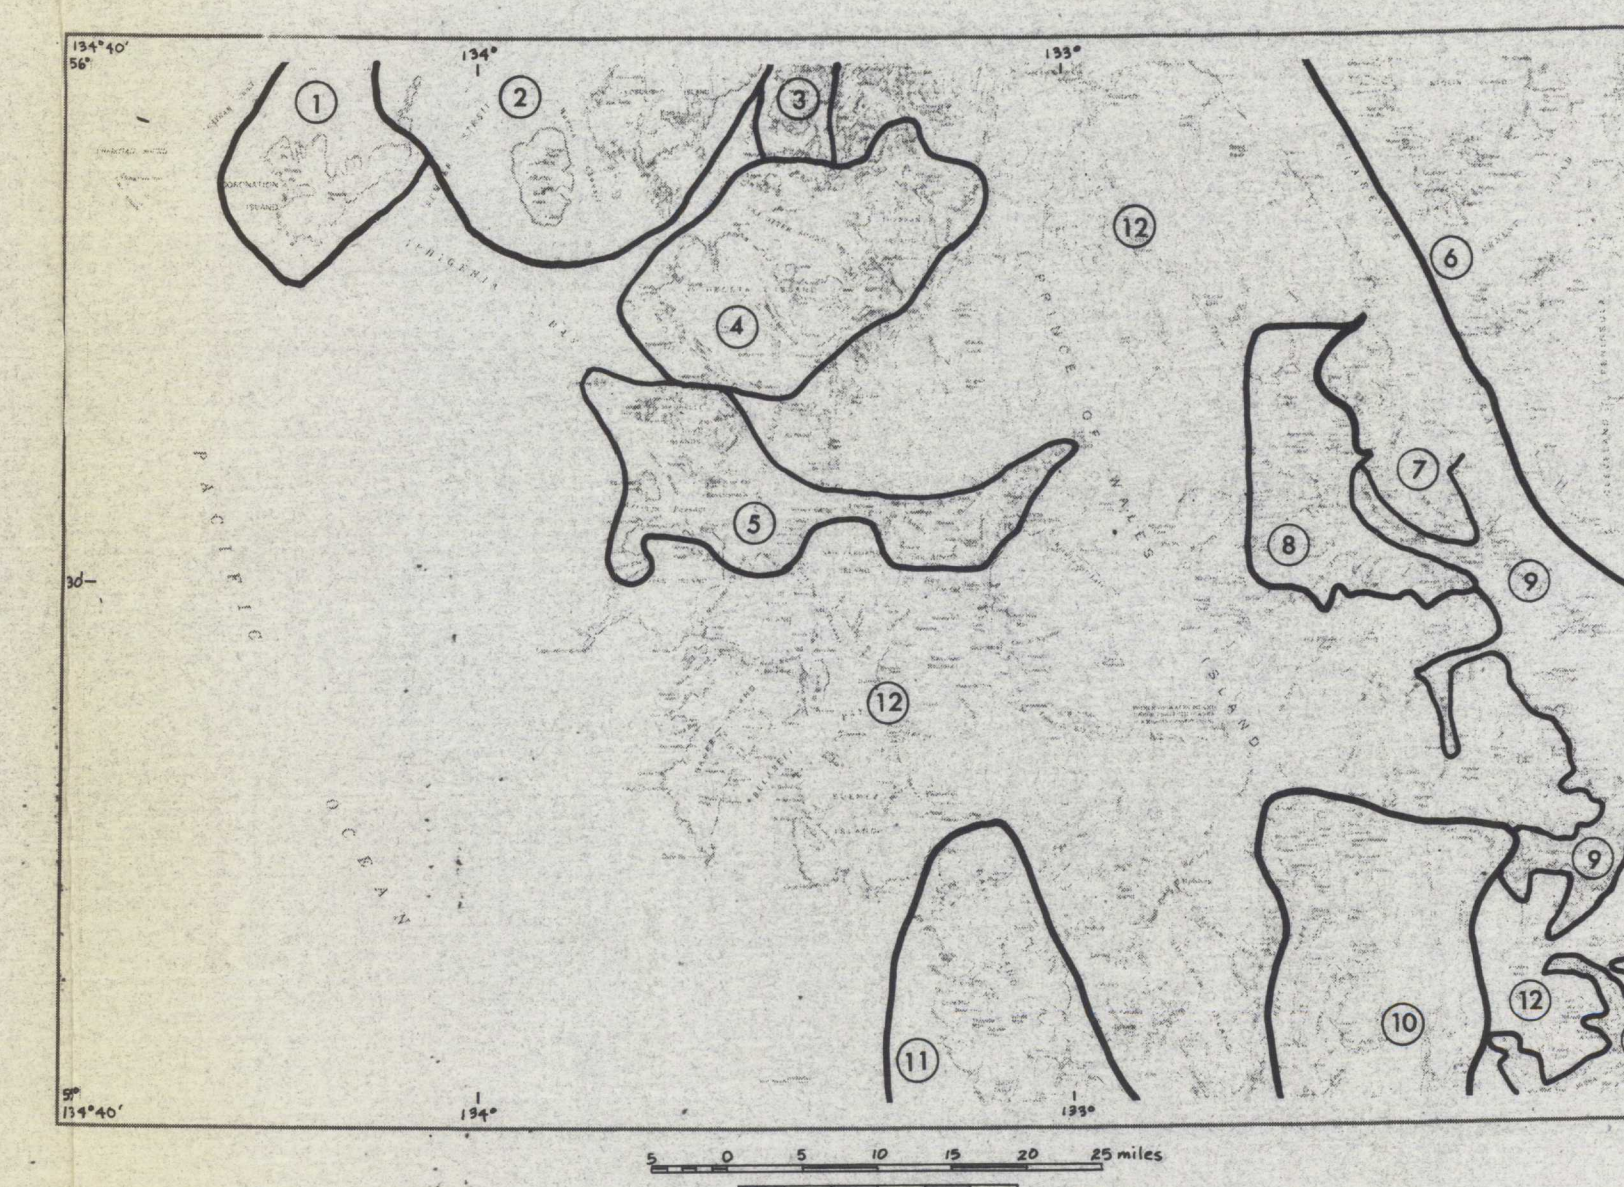

Figure 3. Index map showing principal sources of geologic data (see p. 27).

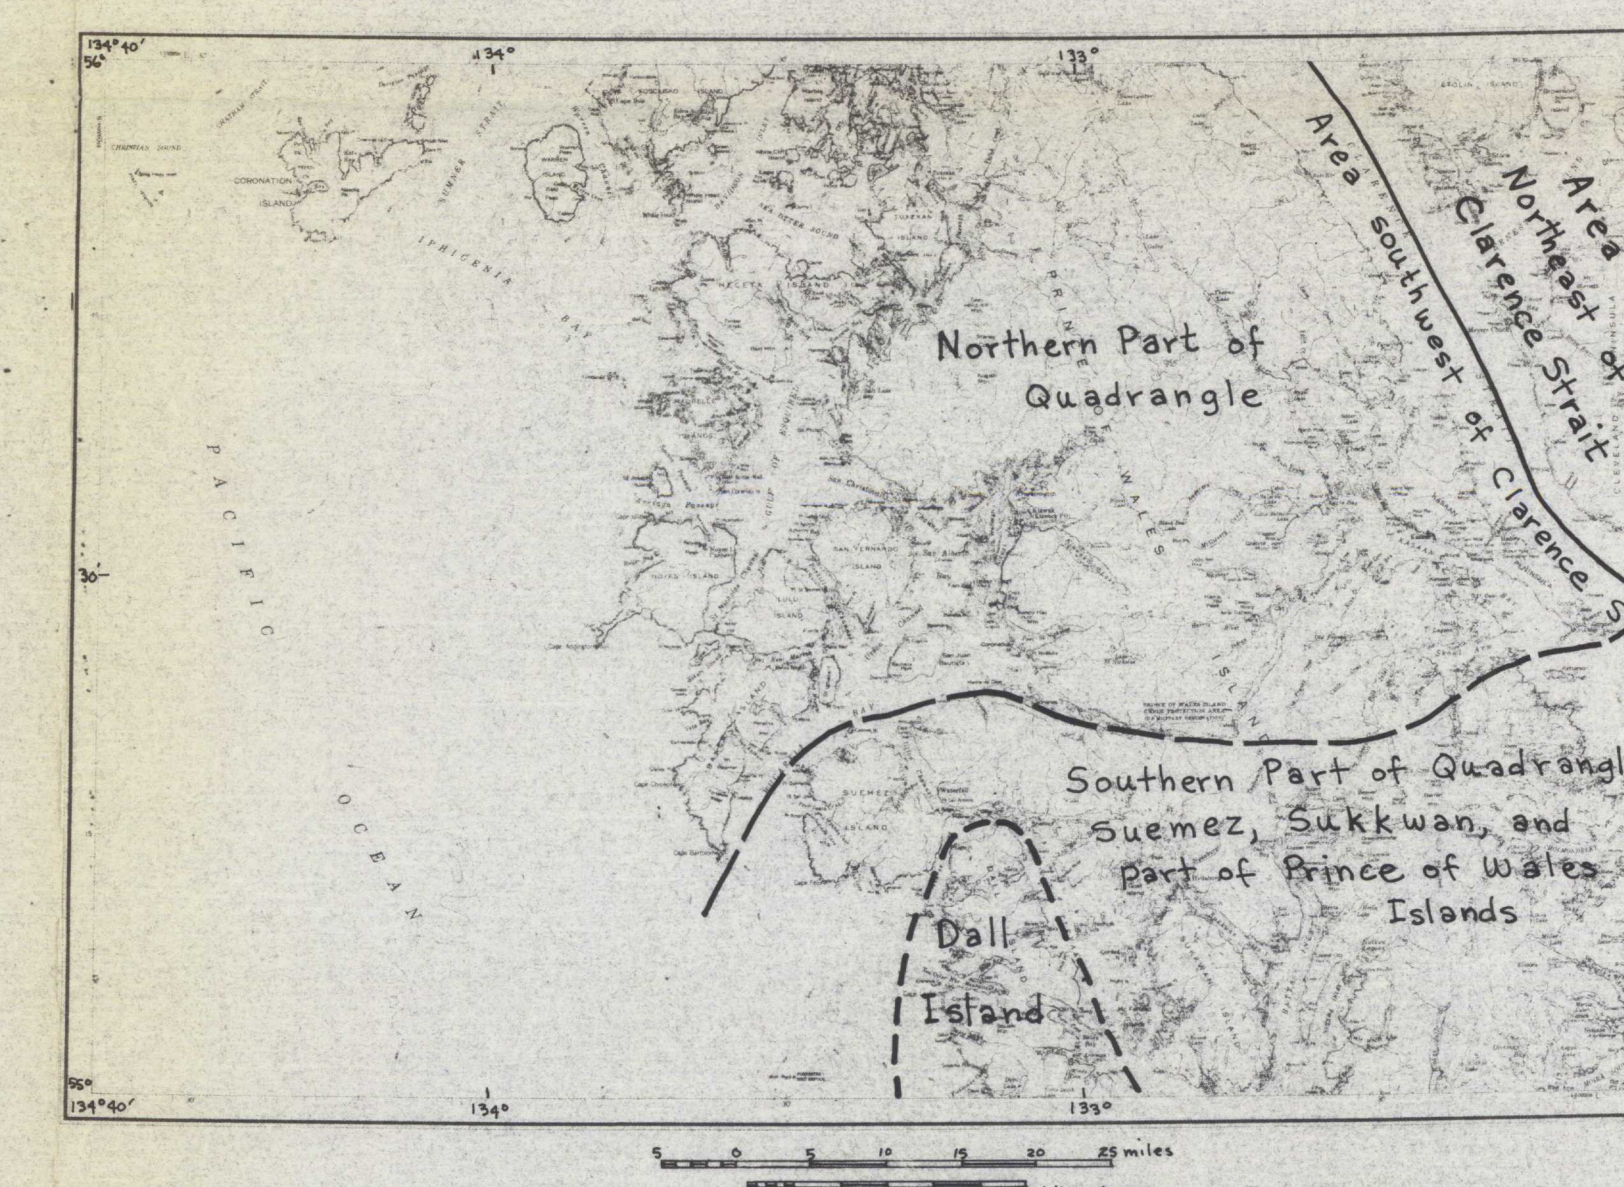

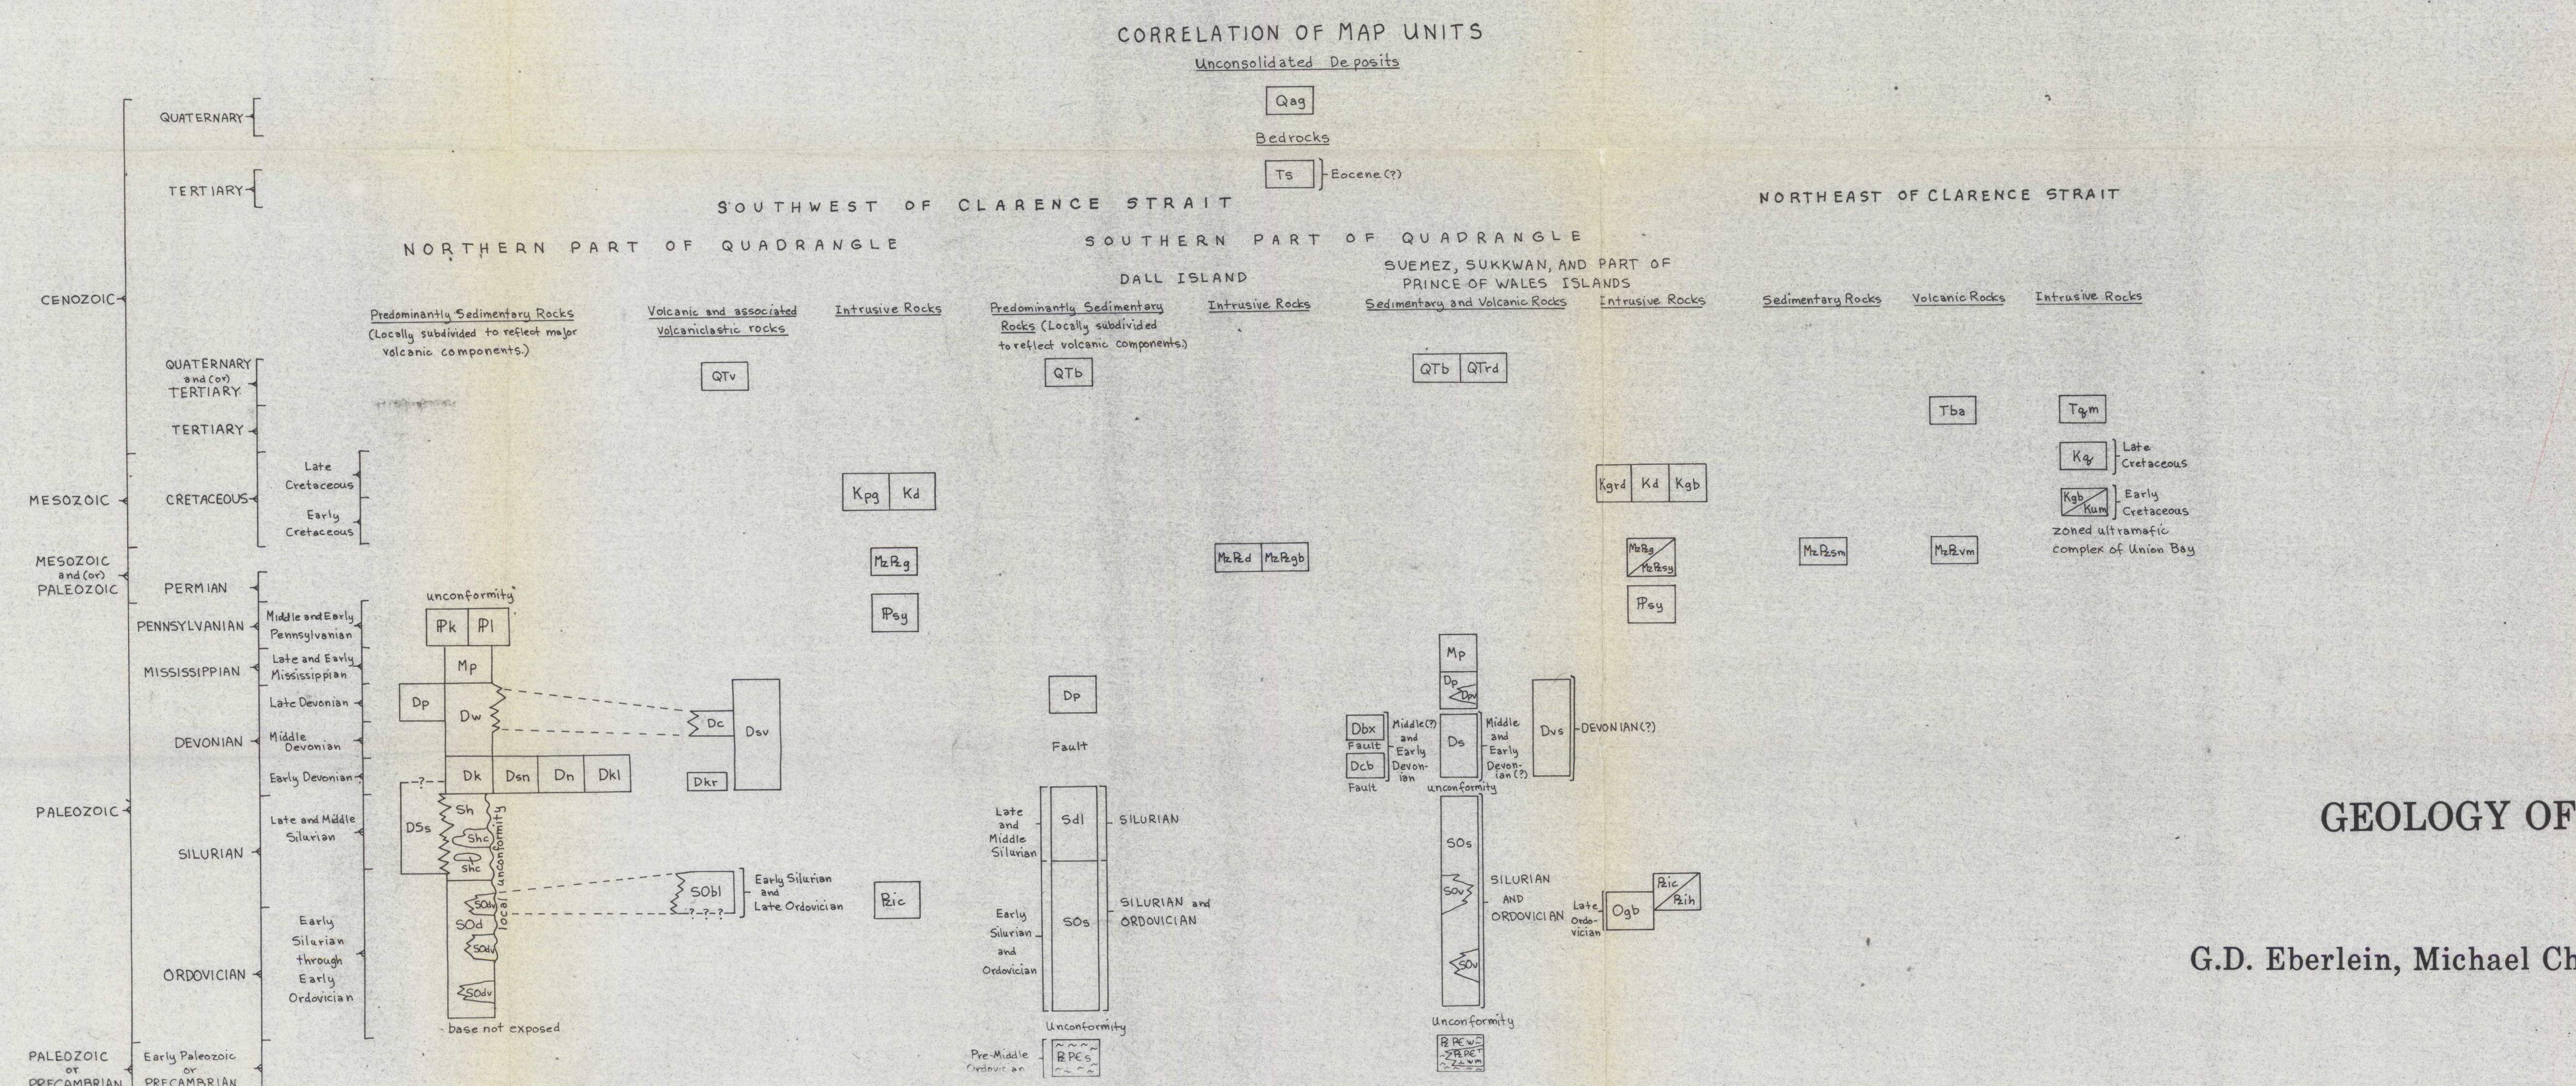

Figure 4. Index map showing geographic limits of regions referred to in the correlation of map units and the description of map units.

GEOLOGY OF THE CRAIG QUADRANGLE, ALASKA
