The sighting of Mount Saint Elias on July 16, 1741 (O.S.), by Vitus Bering on the *Saint Peter* represents the "official" discovery of northwestern America by the Russians. Although many authorities give Bering credit for naming the mountain, it appears more likely that the name was borrowed from Cape Saint Elias by eighteenth century mapmakers and applied to the "high volcano" left unnamed by its discoverer. The first ascent of the mountain was made July 31, 1897, by His Royal Highness, Prince Luigi Amedeo di Savoia, Duke of the Abruzzi and his party. See Farquhar (1959, p. 229, 230). According to H. W. It extends along the whole northwest coast from California to the peninsula of Aliaska." On an 1880 Census map, Ivan Petroff applied the name "St. Elias Alps" to the mountains between the Copper River and Mount Fairweather. Subsequent maps have restricted the application of the name to the above described mountains. *Saint Elias Range: mountain range*, see Saint Elias Mountains.

A short time later a village was established at Zapadni Bay on the southwest coast of the island. Cook says "and by what I can gather from the account of Beering's [sic] voyage, and the chart that accompanies it in the English edition, I conclude, that it must be what he called Cape St. Hermogenes * * *." Wagner (1937, p. 406) says "a name given by * * * Bering July 26, 1741, to a place concerning the location of which there has been much discussion * * *. This was undoubtedly the north point of Marmot Island [Cook's location] * * * although it is now, I believe, erroneously applied to the eastern point of the island * * *." Discovered by Vitus Bering on Saint Lawrence day, August 10, 1728 (O.S.), and named by him, "Saint Lawrence." Baker (1906, p. 542) noted: "G. F. Muller (Voyages, 1761) says: 'They heard of an island which was said to lie somewhat farther, at no great distance from the continent; to this they gave the name of Saint Lawrence, on account of its being the 10th of August, that saint's day, when they passed by it, without observing anything upon it besides cottages of fishermen.' It was also called 'Sind' on early Russian charts, for Lt. Sind [cnna], who passed somewhere near it in 1766.

Capt. James Cook, RN, passed east of this island in 1778 and west of it in 1779. Its eastern end he named "Anderson Island" for Dr. William Anderson, surgeon on H.M.S. *Discovery*, believing it to be a separate island. Later, according to Capt. F. W. Beechey, Cook found that it was part of what the Russians

called Saint Lawrence Island, but died before the correction was made in his published account. Cook named the main body of the island, "Clerkes Island" for Capt. Charles Clerke of the *Discovery*, and its western end, which he shows as another separate island, he calls "Saint Laurence" and "Saint Lawrence," taking the name from Bering.

According to Commodore Joseph Billings, the Chukchi natives of Siberia call this island "E-oo-vogen" which he spells on his chart "Eivoogiena." He also gives the variant names "Clerke" and "Sinde." G. A. Sarichev, who accompanied Billings in 1791-92 shows "Saint Lawrence" or "Eivugen." Lt. Otto von Kotzebue gave the island's Eskimo name as "Tschibocki," a name now preserved as "Chibukak Point."

According to the Rev. Coxe (1787, map facing p. 223) this island was discovered and named by Lt. Sind (Synd) in August 1766. Coxe's map showed it as "I. Apost. Matthei" which is probably a translation from the Russian meaning "Island [of the] Apostle Matthew" probably implying the island was sighted on or near St. Matthew's day. Capt. Cook (1785, p. 491), RN, found the island September 23, 1778 and erroneously thought "it was wholly unknown to the Russians; and therefore, considering it as a discovery of our own, I named it Gore's Island," for Lt. John Gore, RN, of his party. The later Russian maps, however, continued calling it O[strov] Sv[ataya] Matvyia (Sarichev, 1826, map 3, Tebenkov, 1852, map 3) which has been translated into English in its present form.

The population, 109 in 1880, was predominantly Eskimo, and included the village of Techek. In 1890 the population was 101 (in 14 houses); in 1910, 450; in 1920, 371; in 1930, 147; in 1940, 142; and in 1950, 157. The Saint Michael post office and an American military post, called

Cook (1785, v. 2, p. 410), RN, who wrote "We found it to be an island * * * lying in the latitude of 56°10' * * * and it is distinguished in our chart by the name of *Foggy Island*; having reason to believe from its situation, that it is the same which had that name given to it by Beering." Commodore Joseph Billings, (in Sauer, 1802, p. 200), IRN, called the islands "Simedan (or Simedun)" while von Langsdorff (1813-14, v. 2, p. 54), of the Russian embassy to Japan, published the name "Ewdokijeffian Islands" for this group. Fort New Archangel, New Archangel, Novo Arkhangelsk, Novoarkhangelsk, Schitcha, Schitka, Schittkha, Sitcha, Sikhta, Sitki.

After the destruction in 1802 of Mikhailovsk, named for Saint Michael Archangel (see Old Sitka), a new Russian settlement was established in 1804, several miles from the old fort, under the direction of A. A. Baranov. This new settlement, built around a fortification on Castle Hill, was consequently named "Novoarkhangelsk," i.e. "New Archangel." This became the headquarters of the Russian American Company and capital of Russian America. When Russian America was purchased by the United States the town was named Sitka, a Tlingit Indian name, said to mean "by the sea" or "on Shi," the native name for Baranof Island. Sitka was the capital of Alaska until 1900 when territorial administration was transferred to Juneau. The population of the town was 968 in 1867; 1,039 in 1910; 1,175 in 1920; 1,056 in 1930; 1,987 in 1939; and 1,985 in 1950. The Sitka post office was established in 1867.

This national monument was established March 23, 1910, on the site of the Indian stockade, where the Tlingit Indians made their last stand against the Russian settlers at Sitka. The Indian fortress, consisting of thick logs, was occupied by the Indians in 1804, after retreating from their village on Castle Hill, during the occupation of Sitka by the Russians. The fort was attacked by the Russians under the command of Gov. A. A. Baranov and Capt. U. T. Lisianski, IRN, supported by several hundred Aleuts. The junction of the Yukon and Tanana Rivers had been a long and well established Indian trading locality before the coming of the European. See Nuklukayet. Except for the Indian name, the first mention of a settlement in this area was made in 1869 by Capt. C. W. Raymond, U.S. Engineers, who on his map, applied the name "Fort Adams (American Station)," near the mouth of the Tozitna River. Near here, in 1880, Arthur Harper established his Alaska Commercial Company trading post, which he called "Nuklukyet," and which others often referred to as "Harpers Station." "St. James Episcopal Mission," or "Protestant Episcopal Mission of Our Savior,"

was founded in 1891 by Rev. J. L. Prevost, west of Mission Hill. About 1897, one mile downstream from the mission, the trading post of the Northern Commercial Company, "Tanana Station," was established and the Tanana post office was located here in 1898. A half-mile below "Tanana" was the post of the North American Trading and Transportation Company called "Weare," named for Portus B. or Ely E. Weare of that company. In 1899, immediately below Weare, the U.S. Army built "Fort Gibbon" which was abandoned in 1923. The population of the settlement was 27 in 1880 (Nuklukayet); 120 in 1890; 512 in 1910 (Tanana); 312 in 1920; 281 in 1930; 170 in 1939; and 228 in 1950.

Ivan Petroff on an 1880 Census map showed the name "Tennanah Mts." paralleled to the middle course of the Tanana River. The name "Tanana Hills" was applied in 1948 by Erwin Raisz to the physiographic province referred to as the "Yukon-Tanana Highlands" in this report and as the "Yukon-Tanana Upland" in Wahrhaftig (1965, pl. 1), USGS.

It was also known as "River of the Mountain Men." The present spelling of the name was recorded in 1885 by Lt. Allen (1887, p. 71), USA.

They appeared to have established themselves upon this point for the purpose of catching and drying fish." This location was used in the winter of 1866-67 as quarters by Capt. Daniel B. Libby's section of the Western Union Telegraph Expedition, and was known as "Libbysville" or "Libby Station." In 1867 "The Esquimaux," a monthly newspaper, which was published there, noted (July 2, p. 38), "Nook, the spot which divided Grantley Harbor from Port Clarence." In the 1880 Census, Petroff (1884, p. 11) listed a "Nook" at Cape Douglas with a population of 36 Eskimos. It is doubtful that any permanent settlement was established here before 1900, when the village of Teller "was founded * * * after the Bluestone placers, 15 miles to the south, were discovered. A town named "Bering * * * 5 miles south of Teller, was the first settlement, but the newer town of Teller drew its people from it. The latter town [Teller], which, during the boom of 1900, had over 1,000 inhabitants, now has not over 100" (Collier and others, 1908, p. 270). The name was probably derived from the Teller Reindeer Station situated on the north shore of Port Clarence. The population in 1910 was 125;

in 1920, 80; in 1930, 76; in 1939, 118; in 1950, 160. Teller post office was established in 1900 (Ricks, 1965, p. 64). See Teller Mission.

Henry Moore Teller, 1830-1914, U.S. Senator, 1876-82 and 1885-1909, and Secretary of the Interior, 1882-85. The station was operated by the U.S. Government from 1892 to 1900. On September 1, 1900, a Norwegian Evangelical Lutheran mission was established here, and received 100 deer on a five-year loan from the Government (Jackson, 1906, p. 15). About 1906 the U.S. Government's role was diminished, and the mission became dominant. The population in 1950 was 109; prior to this time no population was given. In 1963 the Brevig Mission Post Office was established here. This may have been the site of an old Eskimo village. See Siniogamute.

Although it is difficult to correlate names of the Eskimo villages along the Kuskokwim River on the early small-scale maps, this place appears to have been the same as the "Oogovigamute," population 206, listed in Petroff's 1880 Census. It is probable that E. W. Nelson, U.S. Signal Service, obtained the name for Petroff in January 1879. The 1890 Census listed "Ugavigamiut," population 57. W. S. Post, USGS, on his 1898 fieldsheet recorded "Oknavigamut" with a note "from Kilbuck" (Rev. J. H. Kilbuck, Moravian missionary); he also showed a Moravian Mission school located there. The mission, called "Ougavik," was established about 1893 (Schwalbe, 1951, p. 46) and abandoned about 1906 (p. 94), because of a declining population caused "by a shifting river bed." Cook (1785, v. 2, p. 504), RN, and "Umnak" by Father Veniaminov (1840, v. 1, p. 139). There is an old Aleut legend, as told by Ted Bank (1956, p. 227-228), that when the first Aleuts came to the islands there were no trees, as now, except on this island. There was one tree, with no branches or leaves, so tall that it disappeared in the clouds. The tree was twisted, and to the Aleuts it looked like the seaweed that they used to make fish lines; therefore, they called the island "Umnaks" meaning "fish line." Visions told the people that the tree stood for the Aleut way of life, and if it were destroyed, the Aleut race would disappear forever. When the Russians came to the island, they cut down the tree to make a house for themselves, but they all died soon after. The Aleuts were afraid and built a house around the stump of the tree to protect it. Bank reports that this house is still there.

In 1839 the Russians leased part of Southeast Alaska to the British who changed the name to "Fort Stikine." When the United States purchased Alaska in 1867 a military post, called Fort Wrangell, was established here; it was abandoned in 1877. Fort Wrangel post office was established in 1869; changed to Wrangell in 1902 (Ricks, 1965, p. 21, 72). Because of its location Wrangell became an important supply point for fur traders and miners beginning with the Stikine gold rush in 1861 (Alaska Sportsman, 1962, no. 12, p. 30). The population in 1890 was 316; 1000 (est.) in 1938; 948 in 1945; and 1162 in 1950.
