who had Fidalgo's maps, referred to the feature as "Puerto Fidalgo," it can be assumed that the name appeared either on Fidalgo's own map or Vancouver named it for Fidalgo (Wagner, 1937, p. 387). It appears more likely that Fidalgo intended to call this estuary "Puerto de Mazarredo" in honor of José de Mazarredo.

Hudson Stuck, these Indians had two names for Mount Foraker: "Sultana" meaning "the woman" and "Menlale" meaning "Denali's wife," Denali being Mount McKinley.

- 11). *Var.* Carroll Straight, Icy Channel.
Origin of the name somewhat obscure. Name appears on a manuscript map prepared for the Western Union Telegraph Co. in 1867. It was probably named for John Gastineau, 1820–85, an English civil engineer, who came to Canada in 1858 and did surveying and mapping for the British Columbia government. Baker (1906) says that the name was derived from one of the Hudson Bay Company's steamers. However, this has been questioned since the company had no vessel of this name on this coast. Capt. George Vancouver, who explored this coast in 1794, overlooked this channel, probably because it was choked with ice at the time. The name "Carroll Straight" was probably for Capt. James Carroll, a steamship captain and an early Juneau property owner (DeArmond, 1957, p. 20–21).

Originally an Indian village called "Dtehshuh," meaning "end of the trail." According to Aurel and Arthur Krause (1883, map), it was called "Deshu" or "Däschü." It was a trading post for both the Chilkat and Interior Indians. The first white man to settle here was George Dickinson, an agent for the Northwest Trading Co., who came to the post in 1878. In 1881 a Presbyterian missionary, S. Hall Young, founded the Willard Mission, the name of which was later changed to Haines Mission. In 1884 a post office called Haines P.O. was established here, although the place was locally known as Chilcoot. The town became an important outlet for the Porcupine mining district and marked the beginning of the Dalton Trail. During the Klondike Gold Rush a large number of reindeer imported from Norway was landed at Haines to be used in traversing the passes into the upper Yukon Basin.

This village is listed as "Kaltkhagamute," with a population of 106 in the 1880 Census of I. Petroff. W. S. Post, USGS, spells the name "Kal-tchagamut" on his 1898 fieldsheet, but places the village on the right bank of a slough, 4 miles southwest of the present village called "Kalskag." The place shown by Post is now abandoned, the people have moved to Lower Kalskag and Kalskag.

Indian village called "Kaltag" by the Russians. The 1880 Census lists two villages with this name, differentiated by "Lower" and "Upper." The present village appears to be the one called "Upper Kaltag" and the "Old Kaltag" site probably was "Lower Kaltag." The name may refer to a species of salmon. Kaltag's population was 45 in 1880; 141 in 1910; 89 in 1920; 137 in 1930; 140 in 1940; and 121 in 1950. A post office was established here in 1903 (Ricks, 1965, p. 31).

Indian name reported in 1900 by Lt. J. C. Cantwell, USRCS; he also gave the name as "Rotokakat," undoubtedly obtained from Father Julius Jetté at Nulato who used the "R" to express the "Kh" sound. This name would generally agree then with the Indian name "Khotakhkak" reported in 1842-44 by Lt. L. A. Zagoskin, IRN. See Khotol River. It appears as if the present name "Kaltag River" is one of the rare cases where a village gave its name to a stream.

There was considerable confusion over the application of this Indian name prior to adequate mapping. Lt. J. S. Herron, USA, in 1899 appears to have been first to show a name for the stream when he wrote both Indian names, "Toclat (Con-tay-th-no)"; recognizing the possible confusion of application with the name "Toclat River" of Lt. H. T. Allen, USA, in 1885. Herron also wrote the name as "Con-tay-thno." A. H. Brooks, USGS, called the stream "Toklat" in 1902. Lt. Gibbs, USA, in 1902 and D. L. Reaburn, USGS, in 1903 both mapped the mouth of the stream in its correct position showing it to be the same which Lt. Allen called "Dugan" in 1885 for Lt. Thomas Buchanan Dugan, USA. Gibbs wrote "Cantishna" and Reaburn "Kantishna." The name "Toklat River" is now applied to a branch of the Kantishna.

Cook gave the name "Kaye's Island" to this feature (Wagner, 1937, p. 465). The post office was discontinued in 1875 and re-established in 1888. The town was founded in 1792 by Alexander Baranov, Manager of the Shelikov (later the Russian American) Company from 1792 to 1808. He named it "Pavlovsk Gavan," or "Paul's Harbor." Baranov moved Shelikov's settlement from Three Saints Harbor to this location because "the land surrounding it was higher and drier * * * it was surrounded by the timber needed to build boats, buildings and better fortifications * * *." (Ameigh and Chaffin, 1962, p. 45). The 11th Census in 1890 (1893, p. 74) reported, "The most important permanent settlement in the Second district is Kadiak, designated on our charts as St. Paul. The place was selected as a central station and headquarters of the Russian fur-trading companies in the year 1789 on account of its good harbor and close vicinity of good building timber. Previous to the establishment of New Archangel, or Sitka, on its present site, Kadiak was also the headquarters of the Russian American Company." The town was called "St. Paul" in 1805 by Lisianski (1814, p. 168), and "gavan St. Pavla" in 1849 by Capt. Tebenkov (1852, map 23). "Glotof [sic] however did not land till he reached the last and most Eastward of these islands, called by the inhabitants Kadyak." (Coxe, 1787, p. 124). According to Bancroft (1886, p. 141), "Glotof finally anchored on the 8th of September off the coast of a large and mountain-

ous island, called Kikhtak by the natives, but now known as Kadiak." Petroff (in Bancroft, p. 224) says, "Kikhtak, or Kikhtowik, is the Innu word for island. At the present day [1886] the natives of the peninsula speak of the Kodiak people simply as Kikhtagames, islanders. The tribal name appears to have been Kaniag and the Russian appellation now in use probably derived from both." The name "Kodiak" was first used on October 20, 1778, by Capt. Cook (1785, v. 2, p. 504) who wrote, "It was from him [Ismyloff] that we got the name of Kodiak." During the 1800's many spellings of the name were used and "Kadiak" was adopted as the official name in 1890, but was changed to its present spelling in 1901 because of popular local usage.
